A Breif Introduction About Our Company

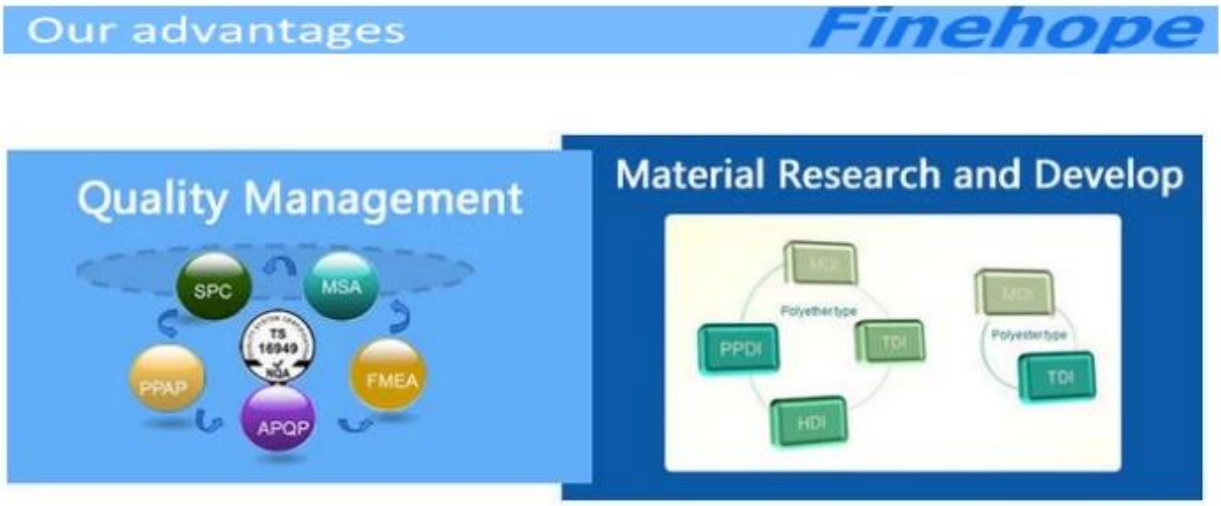
Company information Finehope

Our company is at the leading edge of China's polyurethane manufacturing industry, we currently own 12 pieces of professional high and low polyurethane injection equipment which have been imported from Italy and Germany. We also own 5 independent and continuous production lines.

Our polyurethane manufacturing capacity allows us to create product weights in the range of 1-9,000 grams, and sizes in the range of 1-2,600 millimeters.

All of our products are of preeminent quality standards, and as a result, we have never received a return shipment from a client.

We believe that our quality, reliability, and favorable prices will be attractive to any company looking for a production-capacity manufacturer for polyurethane and other products.



FAQ

1. Why choose Finehope?

Finehope is the most professional PU manufacturer in China, which having a professional research and development team, advance PU production equipments, specialized testing equipments and well-established quality management system. We have building cooperation with international brand ,such as CAT, FIAT, TVH, GGP, for twelve years. We provide comprehensive services for customers, from research to production and meet individual customized need of customers.

2. Benefit of choosing Finehope?

Save your time, reduce your troubles and costs (explicit and implicit).

3. What’s your lead time?

30 working days is needed after opening the mould, not including the

material preparation (depends on the order quantity).
4. What’s your shipment method?
By sea or by air (Fedex /UPS), decided by the customer.
5. How to track the package’s transportation?
Provide the B/L No. to customer if by sea, tracking No. to customer if by air.
6. How does your factory do regarding quality control?
Quality is priority! To provide our customer good quality products is our basic mission. A professional team always keeps the quality control from the beginning to the end:
1) All raw material used are inspected before producing.
2) All workers take formal training before starting job.
3) All products during production process are controlled and inspected.
4) All products are inspected before shipped out from the factory.
