

High Tech Soft PU Foaming Technology

Using high-quality environmental protection PU material and high-tech foaming technology, it is formed in one, free of harmful substances, healthy and tasteless. The material has good physical properties, no deformation after long pressure and full durability

PRODUCT DETAILS

positive

The front leather grain design can effectively prevent slip. You don't have to worry about falling when standing on it

back

The bottom grain is wear-resistant and anti sliding layer, waterproof and anti fouling, which can effectively protect the floor and is not easy to curl

A Variety Of Barber Chairs Are Applicable

You can customize your chair according to the shape of the hair chair

DESIGN OF DECOMPRESSION AND ANTI FATIGUE FLOOR MAT

Scientific and practical design can reduce the influence of gravity, analyze the pressure on the human body, and reduce the damage to the waist, ankle and knee joint caused by standing for a long time. Barbers will prepare such decompression mats for barbers

PRODUCT INFORMATION

Brand: Finehope

Colour: Customizable

Apply: Currency

Place Of Origin: Xiamen, Fujian

Texture Of Material: Polyurethane

Comfortable Decompression · Standing Pad

Long standing without fatigue
Decompression and anti fatigue

USAGE SCENARIO

usage scenario of anti fatigue floor mat

Anti fatigue mat for a long time can effectively alleviate the fatigue of barbers standing for a long time. The mat has strong compression resistance and genuine quality assurance. It is the favorite of barbers.

Production Device

KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM)
High Pressure Machine
KRAUSS MAFFEI
Made in Germany!

Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.
