Specification

PU (Polyurethane) material, suitable for indoor and outdoor use. It is a high-quality, durable material that can be used for various decorative purposes. The material is available in different colors and finishes, and it is easy to maintain. The material is also resistant to UV rays and weathering, making it a perfect choice for outdoor applications. The material is made of high-quality PU resin and is reinforced with glass fibers for added strength and durability. The material is also available in different sizes and shapes, and it can be customized to meet your specific requirements. The material is also available in different finishes, including smooth, textured, and stone-like finishes. The material is also available in different colors, including white, grey, and brown. The material is also available in different sizes, including 10cm, 15cm, and 20cm. The material is also available in different shapes, including square, round, and rectangular. The material is also available in different finishes, including smooth, textured, and stone-like finishes. The material is also available in different colors, including white, grey, and brown. The material is also available in different sizes, including 10cm, 15cm, and 20cm. The material is also available in different shapes, including square, round, and rectangular.

(1)	Item	PU Material (Polyurethane)
(2)	MOQ	100PCS
(3)	Color	White, Grey, Brown
(4)	Finish	Smooth, Textured, Stone-like
(5)	Material	PU Resin
(6)	Payment	T / T
(7)	Lead Time	15-20 working days
(8)	Weight	1.5kg per piece
(9)	Dimensions	10cm x 10cm x 10cm
(10)	Usage	Indoor and Outdoor
(11)	Notes	Please contact us for more details.

Products applications

Products applications

Our company

Finehope 2002 年 在 中 国 成 立 了 一 家 有 限 公 司 ， 32.The 公 司 的 总 面 积 为 7000 平 方 米 ， 总 投 资 额 为 4100 万 元 人 民 币 ， 公 司 的 总 面 积 为 1,000m² 的 办 公 楼 。

Quality control

I. Quality Management

- ◆ Through the continuous push, maintenance and periodic review for the quality management system of ISO9001, ISO/TS 16949, to ensure the system works sufficiently, appropriately and effectively.
- ◆ Five core tools of ISO/TS 16949 : APQP, FMEA, MSA, SPC and PPAP. The effective use of these five core tools can make our quality control and overall management level improved greatly, finally to meet the requirements of customer.

II. Material Research and Develop

◆ Under a professional PU material R&D team, the products that has been put into production include MDI, TDI, HDI and PPDI etc polyether and polyester system formula, which covering all PU systems formula.
