

Building Material

The image is a collage featuring various building materials. On the left, there are three circular insets: the top one shows a white, fluted decorative base; the middle one shows a vertical stone pillar with a rough, textured surface; and the bottom one shows a white, fluted baluster. The background of the entire image is a photograph of a two-story house with a stone facade and a covered porch supported by white columns. The porch has a wooden railing and a white downspout. The house is surrounded by trees with autumn foliage.

Quality control

Quality Management

Material Research and Develop

I. Quality Management

- ◆ Through the continuous push, maintenance and periodic review for the quality management system of ISO9001, ISO/TS 16949, to ensure the system works sufficiently, appropriately and effectively.
- ◆ Five core tools of ISO/TS 16949 : APQP, FMEA, MSA, SPC and PPAP. The effective use of these five core tools can make our quality control and overall management level improved greatly, finally to meet the requirements of customer.

II. Material Research and Develop

◆ Under a professional PU material R&D team, the products that has been put into production include MDI, TDI, HDI and PPDI etc polyether and polyester system formula, which covering all PU systems formula.
