

Building Material

The image displays three circular insets showcasing different building materials. The first inset shows a white, square, fluted decorative base. The second inset shows a section of a stone pillar with a mix of grey and brown tones. The third inset shows a white, fluted baluster. The background features a stone house with a porch supported by white columns, illustrating the application of these materials.

Quality control

Quality Management

Material Research and Develop

I. Quality Management

- ◆ Through the continuous push, maintenance and periodic review for the quality management system of ISO9001, ISO/TS 16949, to ensure the system works sufficiently, appropriately and effectively.
- ◆ Five core tools of ISO/TS 16949 : APQP, FMEA, MSA, SPC and PPAP. The effective use of these five core tools can make our quality control and overall management level improved greatly, finally to meet the requirements of customer.

II. Material Research and Develop

◆ Under a professional PU material R&D team, the products that has been put into production include MDI, TDI, HDI and PPDI etc polyether and polyester system formula, which covering all PU systems formula.
