Product Inspection Standard Setting

Free Product Inspection Standard Setting:
In addition to the usual quantification of product physical properties and appearance standards, we will add REACH, RoHS, FDA, CA-65, or CFC Free to the standards according to customer needs.

Free Mould Opening:
Large order quantity with mould cost free.

Free 3D Design:
Finehope help customer design the desired product or modify the design for free.

Free DFM/A Report:
Finehope will show details and solutions of manufacturability and assemblability through PPT to help customers reduce trouble.

Gran oferta cambiador personalizado de alta densidad para bebé

Categoría: Almohadilla de PU, alfombrilla

Material: PU Poliuretano - Espuma de piel integral

Densidad: 200-250kg/m3

Forma: según los requisitos del cliente para el diseño del producto y el molde personalizado

Color: negro, gris y otros colores se pueden personalizar a pedido.

Embalaje: cartón estándar

Condiciones de pago: 30% de depósito, pago y entrega.

MOQ: 1,000 piezas

Lugar de envío: China • Fujian • Xiamen

Cumple con la certificación: RoSH, REACH, EN71-3, ftálico 6P

Otro: OEM chino y fábricas de procesamiento, especializadas en la producción de productos de PU, incluidos los accesorios (hierro, madera, plásticos, etc.).

Finehope ha obtenido el certificado ISO 9001 de forma continua desde 2003.

Certificación IATF16949:

Finehope aprobó la Certificación de sistemas de gestión de calidad automotriz IATF16949 en 2021. Más de 50 documentos garantizan el progreso del desarrollo de nuevos productos, la calidad, el tiempo de entrega y el costo de los productos de prueba y de producción en masa. Desde la cooperación entre Finehope y Caterpillar en 2007, Finehope ha utilizado el sistema de gestión de calidad automotriz para la introducción de nuevos productos, utilizando las cinco herramientas de SPC, MSA, FMEA, APQP y PPAP, que han recibido elogios de los ejecutivos de Caterpillar y han establecido una larga asociación a largo plazo hasta el momento.

Our Advandages

Capacidades de investigación y desarrollo de materias primas de PU

Desde 2002, Finehope se ha comprometido con el diseño y la fabricación de productos de espuma moldeada de PU. La investigación y el desarrollo independientes de los materiales de la fórmula y la capacidad de producción estable son la base para el aseguramiento de la calidad.

Finehope puede ajustar la fórmula del producto en cualquier momento de acuerdo con las necesidades personalizadas de los productos personalizados de los clientes, como los requisitos de dureza, elasticidad, soporte, sensación, densidad, color y otras propiedades físicas y químicas, y puede hacer que los requisitos de formulación cumplan con las leyes y regulaciones de varios países. Por supuesto, una buena fórmula también debe considerar el mejor rendimiento de costos. Para nuevos proyectos, la capacidad de desarrollar formulaciones de PU es una condición clave para garantizar la calidad del desarrollo del producto, el tiempo de entrega y el costo.

Capacidad de gestión científica.

Finehope destaca la importancia del Sistema de Producción Toyota y el Modelo de Coaching Corporativo para optimizar la eficiencia de la gestión. Mejora continua: la eficiencia y la calidad de todos los empleados, el personal de gestión y producción se han mejorado de manera efectiva y continua, los costos de gestión y producción se han reducido continuamente, pero más importante que la eficiencia y el costo es el cultivo del crecimiento de los empleados a través de la mejora continua, porque este es el núcleo del desarrollo sostenible corporativo.

Capacidades de diseño y fabricación de equipos de automatización.

La capacidad de Finehope para diseñar y fabricar equipos de automatización es rara en la industria. Al participar en el diseño de nuevos equipos de mezcla de inyección de PU y la transformación de automatización de la línea de producción, para garantizar que se reduzca el dividendo demográfico de China bajo la competencia. y los costos de mano de obra continúan aumentando, la eficiencia de producción también se puede mejorar, los costos de mano de obra y materiales se pueden reducir. Además, las capacidades continuas de diseño y fabricación de equipos clave como accesorios, equipos especiales y moldes automáticos también son las razones por las que Finehope ocupa una posición de liderazgo en todos los aspectos. La capacidad de Finehope para reducir costos continuamente e innovar productos puede ayudar a los clientes a generar mayor valor. Por lo tanto, es un socio confiable a largo plazo de muchas empresas Fortune 500 y empresas líderes en la industria.

El refinamiento de Finehope reduce los problemas para los clientes, porque reduce la negligencia en el sistema de procesos humanos y la capacidad de acumular continuamente experiencia profesional, lo que puede garantizar que todos los proyectos nuevos se completen en el menor tiempo posible.

Preguntas más frecuentes

1. ¿Por qué elige Finehope?

Finehope es el fabricante de PU más profesional de China, que cuenta con un equipo profesional de ID, un equipo de producción de PU avanzado, un equipo de prueba profesional y un sistema de gestión de calidad perfecto. Tenemos 12 años de experiencia en cooperación con CAT, FIAT, TVH, STIGA y otras empresas famosas. Les brindamos un servicio de un solo paso desde I D hasta producción para satisfacer sus necesidades de personalización.

2. ¿Cuáles son las ventajas de elegir Finehope?

- 1) Garantía de calidad del producto, garantía de entrega, buen servicio postventa.
- 2) Rentabilidad, eficiencia de desarrollo rápido, operación profesional con integridad.
- 3) Finehope realizará todos los análisis de prueba y luego elaborará estándares de prueba para reducir la disputa de estándares de calidad entre clientes y fabricantes.
- 4) Modo de gestión de producción ajustada.
- 5) Ayudar a los clientes a desarrollar y diseñar nuevos productos.
- 6) Tiene una rica experiencia en el diseño y procesamiento de productos de PU.
- 7) Finehope es una empresa de alta tecnología en China con tecnología de patentes de invención nacional e internacional e intelectual propiedad.

3. ¿Cuáles son las diferencias entre Finehope y sus pares nacionales?

- 1) Garantía de calidad: planificación avanzada de la calidad (APQP).
- 2) Finehope tiene una gran experiencia en el servicio a grandes empresas internacionales.
- 3) Tiene un equipo de investigación científica profesional de material de poliuretano.
- 4) Tiene capacidad independiente de diseño, fabricación e innovación de equipos de producción y moldes.
- 5) Tiene un equipo de ingenieros que es responsable del sistema de garantía de calidad y control de calidad.

4. ¿Cuáles son las diferencias entre Finehope y sus pares europeos y estadounidenses?

- 1) Tiene una cadena de suministro de apoyo perfecta y madura.
- 2) Menores costos de molde.
- 3) Alta eficiencia de desarrollo y capacidad de diseño y tiempo de proceso corto.
- 4) Ventaja de costos y buena actitud de servicio.

5. ¿Cuáles son las aplicaciones de los productos de PU?

Coche, maquinaria de ingeniería, equipos deportivos de fitness, maquinaria médica y artículos domésticos diarios, etc.

About us

Our Certification

Alibaba Verified Supplier Certificate

Since 2007, Finehope has continuously passed TUV certification and has become an Alibaba Verified Supplier. Verified Supplier is a high-quality supplier verified by the authoritative strength of Alibaba platform. Through online and offline on-site audits, the merchants' corporate qualifications, product qualifications, corporate capabilities, and other comprehensive strengths are reviewed and verification.

Integration of Informationization and Industrialization Management System Certificate

The certificate is assessed by the Xiamen Municipal Government and issued by the Shanghai Academy of Quality Management Science. This certificate reflects the level of Finehope's in-depth integration of informatization and industrialization. Finehope will continue to take a new path of industrialization; use information technology as the support to transform and upgrade traditional kinetic energy, cultivate new kinetic energy, and pursue a sustainable development model.

Xiamen Growth-oriented Micro, Small & Medium Enterprises

Finehope has been rated as "Xiamen Growth-oriented Micro, Small & Medium Enterprises" since 2019. It is the scoring result of the Xiamen Municipal Government based on Finehope's various comprehensive indicators, growth models, brand strength in the industry, and good corporate reputation, then issue this certificate. It is a proof that Finehope stands out among thousands of small and medium-sized enterprises in the city.

Work Safety Standardization Certificate

Manufacturing safety is important to prevent or lessen the risk of workplace injury, illness, and death.

Finehope General Manager Tiger Side: "Only those manufacturing facilities which continue to emphasize safety as a top-level issue will remain highly productive and competitive in today's marketplace."

Finehope must be proactive about employee safety. Without a focus on safety, can place their employees at risk, cause fire and face expensive property damage and affect delivery.

Xiamen Science And Technology Little Giant Leading Enterprise

Since 2019, Finehope has been selected as the leading company of Xiamen Science and Technology Little Giant. This certificate was jointly issued by five departments of the Xiamen Municipal Government. The selection criteria focus on strategic emerging industries such as new generation information technology, high-end equipment, new materials, new energy, biology and new medicine, energy saving and environmental protection, and marine high-tech. Winning this honor shows that Finehope is at the forefront of the industry in new information technology and new materials.

Fujian Province Pollution Discharge Permit

Pollution discharge permits are the "identity cards" of all entities involved in the discharge of pollutants and are issued by the Xiamen Municipal Environmental Protection Bureau. General Secretary Xi Jinping emphasized that "the ecological environment should be protected like the eyes, and the ecological environment should be treated like life." Premier Li Keqiang said: "Environmental pollution is a hazard to the people's livelihood and the pain of the people's hearts. It must be dealt with an iron fist." The Chinese government's determination to improve the environmental quality of the atmosphere, water bodies, and soil cannot be ignored. Pollution permits are an important factor that must be considered in international procurement. Otherwise, the factory has hidden dangers and will be ordered to stop production, which will affect the delivery date. It can be seen that Finehope is a manufacturer with long-term cooperation and stable delivery.

Xiamen Specialized, Refining, Differentiate, Innovative SMEs

Finehope has been rated as "Xiamen Specialized, Refining, Differentiate, Innovative SMEs" since 2020. "Specialized, Refining, Differentiate, Innovative" refers to SMEs with outstanding main business, strong professional capabilities, strong R&D and innovation capabilities, and development potential. Mainly concentrated in the new generation of information technology, high-end equipment manufacturing, new energy, new materials, biomedicine and other mid-to-high-end industries. Leading in the same industry in terms of market, quality, efficiency or development, with advanced and exemplary. Through this certificate, the government emphasizes and recognizes finehope's "specialization, special innovation" is to encourage innovation and achieve specialization, reform, and specialization. Finehope should continue to take "specialization, special innovation" as the direction, focus on their main business, practice hard work, strengthening innovation, and build the company into a "single champion" or "supporting expert" with unique skills.

FDA certification

Food and Drug Administration (FDA) established in 1906 is a government agency under the passage of the Federal Food and Drugs Act. The FDA Certification is mandatory for placing the products in the USA. This major responsibility of FDA is protecting and managing public health and related authorities by assuring the safety and security of human and biologically generated product. The FDA regulates products including biological products, medical services, cosmetics, prescription drugs and non-prescription drugs, veterinary drugs, tobacco and other radiation emitting products. Finehope has passed FDA certification every year since 2018. FDA approval means that the products produced by Finehope have obtained foreign government certificates (CFG) and can enter the global market smoothly.

Production Device

KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM)
High Pressure Machine
KRAUSS MAFFEI
Made in Germany!

Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.
