

Personnalisation d'usine Personnalisée Mousse Baby-Tapas à changement de bébé pour bébé

Catégorie: Pad, tapis

Matériau: PU Polyuréthane PU - Mousse de peau intégrale

Densité: 200-250 kg / m3

Forme: selon les exigences du client pour la conception du produit et le moule personnalisé

Couleur: Noir, Gray et d'autres couleurs peuvent être personnalisées sur demande.

Emballage: carton standard

Conditions de paiement: acompte de 30%, paiement et livraison.

MOQ: 1 000 pcs

Lieu de livraison: Chine • Fujian • Xiamen

Rencontrez la certification: ROSH, REACH, EN71-3, Phtalic 6P

Autre: usines d'OEM chinoises et de transformation, spécialisée dans la production de produits PU, y compris les accessoires (fer, bois, plastiques, etc.).

Finehope a obtenu le certificat ISO 9001 en continu depuis 2003.

Certification IATF16949:

Finehope a adopté la certification des systèmes de gestion de la qualité de la qualité de l'IATF16949 en 2021. Plus de 50 documents garantissent la progression du développement de nouveaux produits, de la qualité, du délai de livraison et du coût des produits d'essai et de production de masse.

Depuis la coopération entre Finehope et Caterpillar en 2007, Finehope a utilisé le système de gestion de la qualité de l'automobile pour la nouvelle introduction de produits, utilisant les cinq outils de SPC, MSA, FMEA, APQP et PPAP, qui ont gagné des éloges des caderpillar et établi une longue Partenariat-atterm jusqu'à présent.

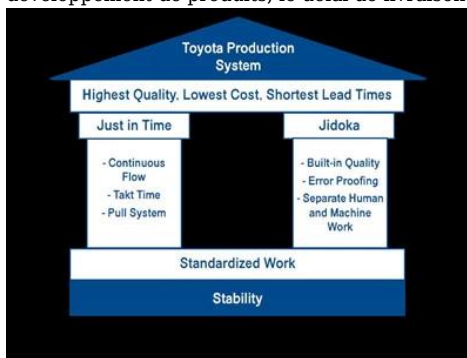

Our Advantages

Capacités de recherche et de développement des matières premières brutes

Depuis 2002, Finehope s'est engagée à la conception et à la fabrication de produits mousses moulés en PU. La recherche et le développement indépendant des matériaux de formule et une capacité de production stable sont la base de l'assurance de la qualité.

Finehope peut ajuster la formule de produit à tout moment en fonction des besoins personnalisés des produits personnalisés des clients, tels que les exigences en matière de dureté, d'élasticité, de soutien, de sensation, de densité, de couleur et d'autres propriétés physiques et chimiques, et peut faire des exigences de formulation dans la conformité avec les lois et règlements de divers pays. Bien sûr, une bonne formule doit également envisager la meilleure performance des coûts. Pour de nouveaux projets, la capacité de développer des formulations PU est une condition essentielle pour assurer la qualité du développement de produits, le délai de livraison et le coût.

Capacité de gestion scientifique

Finehope met l'accent sur l'importance du système de production de Toyota et du modèle de coaching d'entreprise pour optimiser l'efficacité de la gestion. Amélioration continue L'efficacité et la qualité de tous les employés, la gestion et le personnel de production ont été efficacement améliorées, les coûts de gestion et de production continuellement ont été réduits de manière continue, mais plus important que l'efficacité et le coût sont la culture de la croissance des employés grâce à une amélioration continue, car ceci est le noyau du développement durable des entreprises.

Capacité d'automatisation des équipements et capacités de fabrication

La capacité de l'Finehope à concevoir et à fabriquer des équipements d'automatisation est rare dans l'industrie. En participant à la conception de nouveaux équipements de mélange d'injection PU et à la transformation de l'automatisation de la chaîne de production, pour que la concurrence du dividende démographique de la Chine soit réduite et que les coûts de main-d'œuvre continuent d'augmenter, l'efficacité de la production peut également être améliorée, main-d'œuvre et matérielle les coûts peuvent être réduits. De plus, les capacités de conception et de fabrication continues d'équipements clés tels que des luminaires, des équipements spéciaux et des moules automatiques sont également les raisons pour lesquelles Finehope est dans une position de leader dans tous les aspects.

La capacité de Finehope à réduire en permanence les coûts et à innover des produits peut aider les clients à apporter une plus grande valeur. Par conséquent, il s'agit d'un partenaire fiable à long terme de nombreuses entreprises de fortune 500 et de grandes entreprises de l'industrie.

Le raffinement de Finehope réduit le problème des clients, car il réduit la négligence sur le système de processus humain et la capacité d'accumuler en permanence une expérience professionnelle, ce qui peut garantir que tous les nouveaux projets sont terminés dans les plus brefs délais.

FAQ

1. Pourquoi vous choisissez Finehope?

Finehope est le fabricant PU le plus professionnel en Chine, qui possède une équipe de R & D professionnel, un équipement de production PU avancé, un équipement de test professionnel et un système de gestion de la qualité parfait. Nous avons une expérience de coopération de 12 ans avec Cat, Fiat, TVH, Stiga et d'autres entreprises célèbres. Nous leur fournissons un service en une étape de la R & D à la production afin de satisfaire leurs besoins de personnalisation.

2. Quels sont les avantages de choisir Finehope?

- 1) Assurance qualité produit, garantie de livraison, bon service après-vente.
- 2) Efficacité de développement rapide et rentable, fonctionnement professionnel avec intégrité.
- 3) Finehope effectuera toutes les analyses de test, puis élaborera des normes de test afin de réduire le différentiel standard de qualité entre clients et fabricants.
- 4) Mode de gestion de la production maigre.
- 5) Aidez les clients à développer et à concevoir de nouveaux produits.
- 6) Une expérience riche dans la conception et la transformation des produits PU.
- 7) Finehope est une entreprise de haute technologie en Chine avec intérieure et dispose d'une technologie de brevets internationaux et intellectuelle propriété.

3. Quelle est la différence entre Finehope et ses pairs domestiques?

- 1) Assurance qualité: planification de la qualité avancée (APQP).
- 2) Finehope a une riche expérience dans la prestation de grandes entreprises internationales.
- 3) Une équipe de recherche scientifique professionnelle de matériel de polyuréthane est-elle.
- 4) possède une conception indépendante, une capacité de fabrication et d'innovation d'équipement de production et de moules.
- 5) L'équipe d'ingénieurs a-t-elle responsable du système d'assurance qualité et du contrôle de la qualité.

4. Quelles sont les différences entre les pairs Finehope et européen et américain?

- 1) a une chaîne d'approvisionnement parfaite et mature.
- 2) Frais de moule inférieur.
- 3) Efficacité élevée de la capacité de développement et de conception et du temps de processus court.
- 4) Avantage coûteux et bonne attitude de service.

5. Quelles sont les applications des produits PU?

Voiture, machines d'ingénierie, équipement de fitness sportif, machines médicales et articles ménagers quotidiens, etc.

About us

Our Certification

Alibaba Verified Supplier Certificate

Since 2007, Finehope has continuously passed TUV certification and has become an Alibaba Verified Supplier. Verified Supplier is a high-quality supplier verified by the authoritative strength of Alibaba platform. Through online and offline on-site audits, the merchants' corporate qualifications, product qualifications, corporate capabilities, and other comprehensive strengths are reviewed and verification.

Integration of Informationization and Industrialization Management System Certificate

The certificate is assessed by the Xiamen Municipal Government and issued by the Shanghai Academy of Quality Management Science. This certificate reflects the level of Finehope's in-depth integration of informatization and industrialization. Finehope will continue to take a new path of industrialization; use information technology as the support to transform and upgrade traditional kinetic energy, cultivate new kinetic energy, and pursue a sustainable development model.

Xiamen Growth-oriented Micro, Small & Medium Enterprises

Finehope has been rated as "Xiamen Growth-oriented Micro, Small & Medium Enterprises" since 2019. It is the scoring result of the Xiamen Municipal Government based on Finehope's various comprehensive indicators, growth models, brand strength in the industry, and good corporate reputation, then issue this certificate. It is a proof that Finehope stands out among thousands of small and medium-sized enterprises in the city.

Work Safety Standardization Certificate

Manufacturing safety is important to prevent or lessen the risk of workplace injury, illness, and death.

Finehope General Manager Tiger Side: "Only those manufacturing facilities which continue to emphasize safety as a top-level issue will remain highly productive and competitive in today's marketplace."

Finehope must be proactive about employee safety. Without a focus on safety, can place their employees at risk, cause fire and face expensive property damage and affect delivery.

Xiamen Science And Technology Little Giant Leading Enterprise

Since 2019, Finehope has been selected as the leading company of Xiamen Science and Technology Little Giant. This certificate was jointly issued by five departments of the Xiamen Municipal Government. The selection criteria focus on strategic emerging industries such as new generation information technology, high-end equipment, new materials, new energy, biology and new medicine, energy saving and environmental protection, and marine high-tech. Winning this honor shows that Finehope is at the forefront of the industry in new information technology and new materials.

Fujian Province Pollution Discharge Permit

Pollution discharge permits are the "identity cards" of all entities involved in the discharge of pollutants and are issued by the Xiamen Municipal Environmental Protection Bureau. General Secretary Xi Jinping emphasized that "the ecological environment should be protected like the eyes, and the ecological environment should be treated like life." Premier Li Keqiang said: "Environmental pollution is a hazard to the people's livelihood and the pain of the people's hearts. It must be dealt with an iron fist." The Chinese government's determination to improve the environmental quality of the atmosphere, water bodies, and soil cannot be ignored. Pollution permits are an important factor that must be considered in international procurement. Otherwise, the factory has hidden dangers and will be ordered to stop production, which will affect the delivery date. It can be seen that Finehope is a manufacturer with long-term cooperation and stable delivery.

Xiamen Specialized, Refining, Differentiate, Innovative SMEs

Finehope has been rated as "Xiamen Specialized, Refining, Differentiate, Innovative SMEs" since 20-20. "Specialized, Refining, Differentiate, Innovative" refers to SMEs with outstanding main business, strong professional capabilities, strong R&D and innovation capabilities, and development potential. Mainly concentrated in the new generation of information technology, high-end equipment manufacturing, new energy, new materials, biomedicine and other mid-to-high-end industries. Leading in the same industry in terms of market, quality, efficiency or development, with advanced and exemplary.

Through this certificate, the government emphasizes and recognizes finehope's "specialization, special innovation" is to encourage innovation and achieve specialization, reform, and specialization. Finehope should continue to take "specialization, special innovation" as the direction, focus on their main business, practice hard work, strengthening innovation, and build the company into a "single champion" or "supporting expert" with unique skills.

FDA certification

Food and Drug Administration (FDA) established in 1906 is a government agency under the passage of the Federal Food and Drugs Act. The FDA Certification is mandatory for placing the products in the USA. This major responsibility of FDA is protecting and managing public health and related authorities by assuring the safety and security of human and biologically generated product. The FDA regulates products including biological products, medical services, cosmetics, prescription drugs and non-prescription drugs, veterinary drugs, tobacco and other radiation emitting products. Finehope has passed FDA certification every year since 2018. FDA approval means that the products produced by Finehope have obtained foreign government certificates (CFG) and can enter the global market smoothly.

Production Device

KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM) High Pressure Machine
KRAUSS MAFFEI
Made in Germany!

Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.

Social Responsibility
