Product Inspection Standard Setting

Free Product Inspection Standard Setting:
In addition to the usual quantification of product physical properties and appearance standards, we will add REACH, RoHS, FDA, CA-65, or CFC Free to the standards according to customer needs.

Free Mould Opening:
Large order quantity with mould cost free.

Free 3D Design:
Finehope help customer design the desired product or modify the design for free.

Free DFM/A Report:
Finehope will show details and solutions of manufacturability and assemblability through PPT to help customers reduce trouble.

Usine personnaliser le tableau de bord de pièces de fourche de machine

d'ingénierie d'unité centrale de polyuréthane

Catégorie: Pièces de machines d'ingénierie PU

Matière : PU Polyuréthane - mousse rigide

Densité : 200-250kg/m³

Forme : selon les exigences du client pour la conception du produit et le moule personnalisé

Couleur : noir et d'autres couleurs peuvent être personnalisées sur demande.

Conditionnement : boîte en carton

Conditions de paiement : acompte de 30 %, paiement et livraison.

MOQ : 100 pièces

Lieu d'expédition : Chine • Fujian • Xiamen

Conforme à la certification : RoSH, REACH, EN71-3, phtalique 6P

Autres : OEM chinois et usines de transformation, spécialisées dans la production de produits en PU, y compris les accessoires (fer, bois, plastiques, etc.).

Finehope a obtenu le certificat ISO 9001 en continu depuis 2003.

Certification IATF16949 :

Finehope a passé la certification IATF16949 des systèmes de gestion de la qualité automobile en 2021. Plus de 50 documents garantissent l'avancement du développement de nouveaux produits, la qualité, le délai de livraison et le coût des produits d'essai et de production de masse. Depuis la coopération entre Finehope et Caterpillar en 2007, Finehope a utilisé le système de gestion de la qualité automobile pour l'introduction de nouveaux produits, en utilisant les cinq outils de SPC, MSA, FMEA, APQP et PPAP, qui ont remporté les éloges des dirigeants de Caterpillar et établi une longue -partenariat à long terme jusqu'à présent.

 Our Advantages

Capacités de recherche et de développement de matières premières PU

Depuis 2002, Finehope s'est engagé dans la conception et la fabrication de produits en mousse moulée PU. La recherche et le développement indépendants de matériaux de formule et une capacité de production stable sont la base de l'assurance qualité. Finehope peut ajuster la formule du produit à tout moment en fonction des besoins personnalisés des produits personnalisés des clients, tels que les exigences de dureté, d'élasticité, de support, de toucher, de densité, de couleur et d'autres propriétés physiques et chimiques, et peut rendre les exigences de formulation conformes. avec les lois et réglementations des différents pays. Bien entendu, une bonne formule doit également tenir compte du meilleur rapport coût/performance. Pour les nouveaux projets, la capacité à développer des formulations PU est une condition essentielle pour garantir la qualité, le délai et le coût de développement des produits.

Capacité de gestion scientifique

Finehope souligne l'importance du système de production Toyota et du modèle de coaching d'entreprise pour optimiser l'efficacité de la gestion. Amélioration continue l'efficacité et la qualité de tous les employés, du personnel de gestion et de production ont été efficacement et continuellement améliorées, les coûts de gestion et de production ont été continuellement réduits, mais plus important que l'efficacité et le coût est la culture de la croissance des employés grâce à l'amélioration continue, Parce que c'est au cœur du développement durable des entreprises.

Capacités de conception et de fabrication d'équipements d'automatisation

La capacité de Finehope à concevoir et à fabriquer des équipements d'automatisation est rare dans l'industrie. En participant à la conception de nouveaux équipements de mélange d'injection de PU et à la transformation de l'automatisation de la ligne de production, pour s'assurer que sous la concurrence de la Chine, le dividende démographique est réduit et les coûts de main-d'œuvre continuent d'augmenter, l'efficacité de la production peut également être améliorée, les coûts de main-d'œuvre et de matériaux peuvent être réduits. De plus, les capacités continues de conception et de fabrication d'équipements clés tels que les montages, les équipements spéciaux et les moules automatiques sont également les raisons pour lesquelles Finehope occupe une position de leader dans tous les aspects.

La capacité de Finehope à réduire continuellement les coûts et à innover dans les produits peut aider les clients à apporter une plus grande valeur. Par conséquent, c'est un partenaire fiable à long terme de nombreuses entreprises Fortune 500 et des entreprises leaders du secteur.

Le raffinement de Finehope réduit les problèmes pour les clients, car il réduit la négligence sur le système de processus humain et la capacité d'accumuler en permanence une expérience professionnelle, ce qui peut garantir que tous les nouveaux projets sont achevés dans les plus brefs délais.

FAQ

1. Pourquoi avez-vous choisi Finehope ?

Finehope est le fabricant de PU le plus professionnel en Chine, qui dispose d'une équipe de R&D professionnelle, d'un équipement de production de PU avancé, d'un équipement de test professionnel et d'un système de gestion de la qualité parfait. Nous avons une expérience de coopération de 12 ans avec CAT, FIAT, TVH, STIGA et d'autres entreprises célèbres. Nous leur fournissons un service en une étape de la R&D à la production pour satisfaire leurs besoins de personnalisation.

2. Quels sont les avantages de choisir Finehope ?

- 1) Assurance qualité du produit, garantie de livraison, bon service après-vente.
- 2) efficacité de développement rapide et rentable, fonctionnement professionnel avec intégrité.
- 3) Finehope effectuera toutes les analyses de test, puis élaborera des normes de test pour réduire les conflits de normes de qualité entre clients et fabricants.
- 4) Mode de gestion de la production au plus juste.
- 5) Aider les clients à développer et concevoir de nouveaux produits.
- 6) Possède une riche expérience dans la conception et le traitement de produits en PU.
- 7) Finehope est une entreprise de haute technologie en Chine avec une technologie de brevets d'invention nationale et internationale et intellectuelle propriété.

3. Quelle est la différence entre Finehope et ses pairs nationaux ?

- 1) Assurance qualité : planification avancée de la qualité (APQP).

- 2) Finehope possède une riche expérience au service des grandes entreprises internationales.
- 3) A une équipe de recherche scientifique professionnelle en polyuréthane.
- 4) Possède une capacité de conception, de fabrication et d'innovation indépendante des équipements de production et des moules.
- 5) A une équipe d'ingénieurs responsable du système d'assurance qualité et du contrôle qualité.

4. Quelles sont les différences entre Finehope et ses homologues européens et américains ?

- 1) A une chaîne d'approvisionnement de soutien parfaite et mature.
- 2) Réduction des coûts de moule.
- 3) Haute efficacité de la capacité de développement et de conception et temps de traitement court.
- 4) Avantage de coût et bonne attitude de service.

5. Quelles sont les applications des produits PU ?

Voiture, machines d'ingénierie, équipement de fitness sportif, machines médicales et articles ménagers quotidiens, etc.

About us

Our Certification

Alibaba Verified Supplier Certificate

Since 2007, Finehope has continuously passed TUV certification and has become an Alibaba Verified Supplier. Verified Supplier is a high-quality supplier verified by the authoritative strength of Alibaba platform. Through online and offline on-site audits, the merchants' corporate qualifications, product qualifications, corporate capabilities, and other comprehensive strengths are reviewed and verification.

Integration of Informationization and Industrialization Management System Certificate

The certificate is assessed by the Xiamen Municipal Government and issued by the Shanghai Academy of Quality Management Science. This certificate reflects the level of Finehope's in-depth integration of informatization and industrialization. Finehope will continue to take a new path of industrialization; use information technology as the support to transform and upgrade traditional kinetic energy, cultivate new kinetic energy, and pursue a sustainable development model.

Xiamen Growth-oriented Micro, Small & Medium Enterprises

Finehope has been rated as "Xiamen Growth-oriented Micro, Small & Medium Enterprises" since 2019. It is the scoring result of the Xiamen Municipal Government based on Finehope's various comprehensive indicators, growth models, brand strength in the industry, and good corporate reputation, then issue this certificate. It is a proof that Finehope stands out among thousands of small and medium-sized enterprises in the city.

Work Safety Standardization Certificate

Manufacturing safety is important to prevent or lessen the risk of workplace injury, illness, and death.

Finehope General Manager Tiger Side: "Only those manufacturing facilities which continue to emphasize safety as a top-level issue will remain highly productive and competitive in today's marketplace."

Finehope must be proactive about employee safety. Without a focus on safety, can place their employees at risk, cause fire and face expensive property damage and affect delivery.

Xiamen Science And Technology Little Giant Leading Enterprise

Since 2019, Finehope has been selected as the leading company of Xiamen Science and Technology Little Giant. This certificate was jointly issued by five departments of the Xiamen Municipal Government. The selection criteria focus on strategic emerging industries such as new generation information technology, high-end equipment, new materials, new energy, biology and new medicine, energy saving and environmental protection, and marine high-tech. Winning this honor shows that Finehope is at the forefront of the industry in new information technology and new materials.

Fujian Province Pollution Discharge Permit

Pollution discharge permits are the "identity cards" of all entities involved in the discharge of pollutants and are issued by the Xiamen Municipal Environmental Protection Bureau. General Secretary Xi Jinping emphasized that "the ecological environment should be protected like the eyes, and the ecological environment should be treated like life." Premier Li Keqiang said: "Environmental pollution is a hazard to the people's livelihood and the pain of the people's hearts. It must be dealt with an iron fist." The Chinese government's determination to improve the environmental quality of the atmosphere, water bodies, and soil cannot be ignored. Pollution permits are an important factor that must be considered in international procurement. Otherwise, the factory has hidden dangers and will be ordered to stop production, which will affect the delivery date. It can be seen that Finehope is a manufacturer with long-term cooperation and stable delivery.

Xiamen Specialized, Refining, Differentiate, Innovative SMEs

Finehope has been rated as "Xiamen Specialized, Refining, Differentiate, Innovative SMEs" since 2020. "Specialized, Refining, Differentiate, Innovative" refers to SMEs with outstanding main business, strong professional capabilities, strong R&D and innovation capabilities, and development potential. Mainly concentrated in the new generation of information technology, high-end equipment manufacturing, new energy, new materials, biomedicine and other mid-to-high-end industries. Leading in the same industry in terms of market, quality, efficiency or development, with advanced and exemplary. Through this certificate, the government emphasizes and recognizes finehope's "specialization, special innovation" is to encourage innovation and achieve specialization, reform, and specialization. Finehope should continue to take "specialization, special innovation" as the direction, focus on their main business, practice hard work, strengthening innovation, and build the company into a "single champion" or "supporting expert" with unique skills.

FDA certification

Food and Drug Administration (FDA) established in 1906 is a government agency under the passage of the Federal Food and Drugs Act. The FDA Certification is mandatory for placing the products in the USA. This major responsibility of FDA is protecting and managing public health and related authorities by assuring the safety and security of human and biologically generated product. The FDA regulates products including biological products, medical services, cosmetics, prescription drugs and non-prescription drugs, veterinary drugs, tobacco and other radiation emitting products. Finehope has passed FDA certification every year since 2018. FDA approval means that the products produced by Finehope have obtained foreign government certificates (CFG) and can enter the global market smoothly.

Production Device

KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM)
High Pressure Machine
KRAUSS MAFFEI
Made in Germany!

Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.
