

## First, the product description

### 1. Features

#### Professional good quality stroller tires new airless tire wheelbarrow tire

#### Properties of PU solid tires:

1. No boat (filled PU material instead of the pipe), strong bearing capacity;
2. Strong wear resistance, is 6 times the tire.
3. Lightweight and durable, heat-resistant, cold-resistant, corrosion resistance, good elasticity (minus 40 to obtain the original elasticity);
4. Do not fear the nail strip, explosion-proof, anti-bar, long life;
5. Product yellowing resistance (3.5), anti-aging, can be prepared in a variety of colors;
6. Good resilience;
7. Eco-Friendly Products (no fluoride, no heavy metals, in accordance with REACH, ROHS) can be reduced, energy saving and safety.

### 2, the product

#### PU solid tire series products are widely used in:

Inflation free tire: Wheelchair car, electric cars, scooters, carts, strollers, depot, old car, industrial and mining vehicles, electric cars, electric scooters, lawnmowers, golf carts, luggage wheel, airport baggage car products.

Secondly, with regard us

### 1 Introduction

- We are a leading manufacturer of molded polyurethane products manufacturer, was founded in 2002. Our products are mainly in European and US markets.
- We have a professional production of polyurethane products top quality requirements for the destination. The main reason customers choose our imagination of our broad R & amp; D capabilities and with international brand companies and many years of experience with the delivery quality.
- Division I according to the Swiss SGS ISO9001-2008 certification in accordance with TS16949 quality control system. Lean is we aim to reduce waste, create value, sustained commitment to help our customers control costs and create added value.

### 2, our brand customers

Located in different regions and sectors North and South America, Europe, Asia ..... welcome your visit, thank you!

### 3, our advantage

A. Quality management through the ISO9001 company, to further promote ISO / TS 16949 quality management system to obtain, and are regularly reviewed to ensure their full, adequate and effective operation;

ISO / TS 16949 five core tools: so that our quality control and general management level have been greatly improved, and ultimately to meet effective use of APQP, FMEA, MSA, SPC, PPAP customer requirements.

B. materials, research and development of polyurethane material has a professional R & amp; amp; D team has been brought in products including MDI, TDI, HDI and PPDI and other polyether, polyester-systems formula, all polyurethane systems formulations.

C. improved equipment for the means of production has the ability to improve themselves and self-designed research Jidoka mold fixture, lean Dong line.

D. Toyota Lean Production with TPS lean management model to improve production, reduce waste and reduce costs.

### 4, our production

- Has the most advanced production equipment PU industry, including KraussMaffei machines and other production materials with different PU products of high / low perfusion presses;

- automated assembly line operations, including perfusion lines, painting, polishing lines, since shattered shape lines.
- have independent mold design, manufacture, introduce the ability to innovate, and a wealth of experience in the design and processing of metals, plastics and other parts of the PU;

### 5, our test model

- Fine Hope PU material has a range of testing equipment, and dedicated quality assurance and quality control engineers.
- Fine Hope take the examination of the product analysis, mechanical analysis products and materials, and ultimately the development of a test product. Whereby the quality standards disputes between customers and manufacturers.

6, we have certificates

- Fine Hope as Huaqiao University, Xiamen University and the polyurethane product research and postgraduate training base station.
- Fine Hope domestic high-tech enterprises, with a number of domestic and foreign patents polyurethane intellectual invention.
- Fine Hope passed ISO9001 certification, Alibaba, Alibaba is also a boutique company Prudential companies.

Thirdly FAQ

## 1) Why did you choose Fine Hope

Fine Hope is China's most professional manufacturer of PU, has a professional R & amp; amp; D team, advanced PU production equipment, professional testing equipment and perfect quality management system. Division I and CAT, FIAT, TVH, GGP and other famous enterprises have 12 years of experience in partnering. Division I offer you one-stop service from the production and respond individually to their needs.

## 2) Select Fine Hope benefits

Reduce your time to reduce personal problems, to reduce costs (both explicit and implicit costs).

## 3) the product delivery cycle

After receipt of the deposit and the completion of 30 days to complete mold production, preparation and equipment without waiting time 10 days (depending on order quantity).

## 4) Product Transport

Qiyun, shipping, air transport (FedEx / UPS), according to customer requirements.

## 5) How to transport of goods Track

If the ocean bill of lading number will be provided to the customer, are if they offer air transport fast waybill number.

## 6) How good product quality control

First quality, providing customers with high quality products is our mission. A professional team from beginning to end, good product quality control:

- All raw materials, parts before production will have to undergo a strict control;
- All workers must preproduction to undergo formal training;
- All products must pass strict control and inspection in the production process;
- All products must be checked before resending.
