

First, the product description

1. Product Features

Tires Chinese polyurethane wheels, manufacturers of Chinese tires, car tires PU, solid tire supplier Chinese

PU solid tire characteristics:

1. Inflatable (polyurethane filling material, instead of the tube), strong bearing capacity;
2. Wear resistance, it is six times the rubber tires.
3. Lightweight, durable, heat, cold, corrosion resistance, good elasticity (less than 40 to maintain the original flexibility);
4. Nails are not afraid of it, explosion-proof, bar, long life;
5. Resistance to yellowing of the product (3.5), anti-aging, can be converted into a variety of colors;
6. Good flexibility;
7. Ecological products (non-fluorinated, heavy metals, according to REACH, RoHS), energy efficiency and security, can be degraded.

2 product uses

PU solid tires products are widely used:

Free tire inflation: wheelchairs, electric cars, scooters, cars, baby, warehouses, old cars, industrial and mining vehicles, electric vehicles, electric scooters, lawn mowers, golf carts, luggage wheels, airports products baggage car.

Secondly, in relation to us

1. Introduction

- We are molded products of leading manufacturer Manufacturer polyurethane, was established in 2002. Our products are mainly exported to European and American markets.
- We have a professional production of polyurethane products as the goal, the quality requirements. The main reason customers choose us saw our extensive R & amp; R & D capability and international brand companies, and to ensure the quality and long-term experience in shipping; amps.
- Division I after the Swiss SGS ISO9001-2008 certification, in accordance with the quality control system TS16949. Lean is that we have been pursuing the goal of reducing waste, creating added value, sustained commitment to help customers control costs and create more value.

2 brand clients

Located in various regions and sectors of the Americas, Europe, Asia welcome, thank you!

3, Our advantage

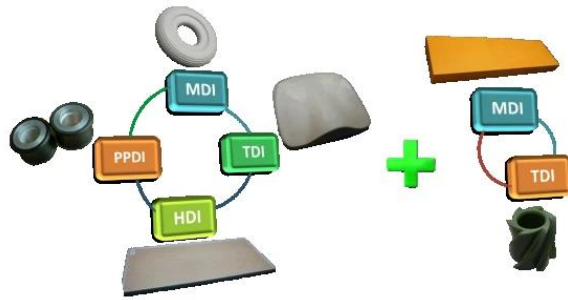

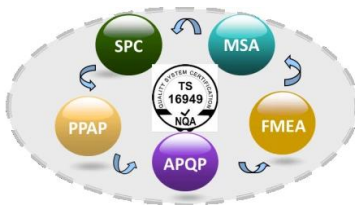

A. Through ISO9001 quality management company, followed by promoting management system ISO 16949 / TS quality, maintain and periodically reviewed to ensure their full, proper and efficient operation;

ISO / TS 16949 five main tools: the effective use of APQP, FMEA, MSA, SPC, PPAP, so our quality management and general management level has been greatly improved, and ultimately, to meet the needs the client's.

B. Development of Materials Research and the polyurethane material has a professional R & amp; amp; amp; R & D has been put into products including MDI, TDI, HDI, and PPDI and other polyether, polyester systems formula, which covers all formulations of polyurethane systems.

C. improving equipment production equipment capable of self-improvement and self-designed research Jidoka accessory mold of the lean in this direction.

D. Toyota lean production using TPS lean model to improve the efficiency of production management, reduce waste and reduce costs.

4, Our production

- Polyurethane has most advanced production equipment industry, including KraussMaffei machines and machine

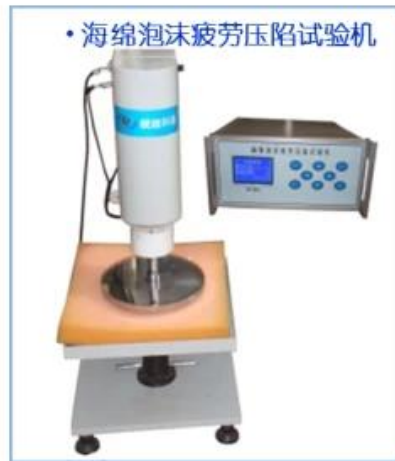

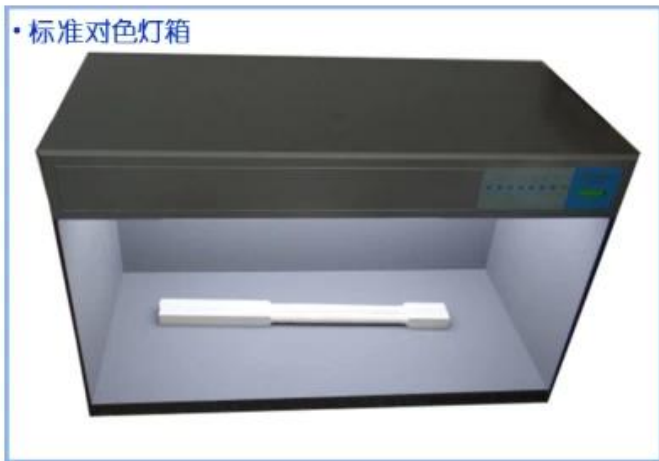

- perfusion different polyurethane products high / low pressure and other production materials;
- Operations of the automated assembly line, including the infusion line, covering production lines, polishing line, because the line to shake mode.
- A mold design, production, innovation and experienced independent design and machining of metal, plastic and polyurethane and elsewhere;

5, our test team

- Finehope PU material has a range of test equipment, and special engineers for quality assurance and quality control.
- Finehope be carried out to detect product analysis, mechanical analysis, products and materials, and ultimately the development of a test product. Thus reducing the quality standards among customers and suppliers controversy.

6 certificates Us

- Finehope of Huaqiao University, Xiamen University and the polyurethane product research and postgraduate training base station.
- Finehope national high-tech enterprises, with a number of rights of domestic and foreign patents polyurethane intellectual property.
- Finehope passed ISO9001 certification, Ali Baba, Ali Baba is a boutique firm Prudential business.

Third, FAQ

1) Why did you choose Finehope

Finehope PU China is the most professional manufacturer, has a professional R & amp; amp; R & D team, advanced production equipment PU, the professional testing equipment and perfect management system quality. Our popular CAT companies, Fiat, TVH, GGP and thus has 12 years of experience of cooperation. Division I provide them from production and one-stop personalized services to meet your needs.

2) Select benefits Finehope

Reduce time, reduce personal problems, reduce the (explicit and implicit costs) costs.

3) the cycle of product delivery

Within 30 days after receipt of deposit and completed after the completion of mold production, production and equipment without queuing period of 10 days (according to order quantity).

4) Transportation Product

Qiyun, shipping, air transport (FedEx / UPS), depending on customer needs.

5) How to track cargo

If the draft law ocean shipment to the customer number will be provided, if provide rapid air waybill number.

6) How good control of product quality

Quality first, provide customers with high quality products is our mission. A professional from the beginning to the end equipment, quality control of the product:

- All raw materials, parts and components must undergo a rigorous inspection before production;
- All staff must go through a trial production of formal training;
- All products must pass strict control and inspection in the production process;
- All products must be re-inspected before shipment.

Fourth, please contact us

Please do not hesitate to contact me if you have interesting in our products.
