Feature:

1. Waterproof, anti-bacteria, non-slip, self-skinning, fireproof
2. Tight secure velcro for easy adjustment.
3. Soft, comfortable, anti-fatigue, multi-purpose, anti fatigue, anti-corrosion
4. Anticorrosion, damp-proof, anti-crack, mothproof, anti-ultraviolet
5. No radiation, thick high density multi-layer on high impact zones.

Specification

Polyurethane self-skin product is widely used in sports apparatus seating mat of gymnastic appliances,backrest,kneeling pad,handle,footboard,bike saddle,sports protective rings.It is also extensively used medical appliances,such as integrally shaped seating chair,edge seal of operating table,object hanging rack,wheel chair handle etc.
The self-skin product is made in one operation by means of reaction injection molding (RIM),and therefore it has both tenacious and dense outer skin and cellulite core. The thickness of the skin formed varies form several tenths to 5 mm and the skin density from 600 to 1200kg/m³ whereas the density of the inner core is hundreds of kilos per cubic meters.
The skin layer and the core layer are an integral body. The continuous,smooth and soft skin layer can protect the foam core from mechanical damage.Semi hard foam series of integral PU varies in different density and hardness depending on the recipe.
The polyurethane is characterized by the fact that it can be sintered integrally with the material filled in the molding process. The basic features of this kind of foam are: extremely high anti-impact,light weighted, highly productive,variable hardness and abrasive-resistant,everlasting elastic,easily colored on the surface, easily coloring the entire body,and intensifiable by inserts.

1	material	Polyurethane (PU), an advanced and trustworthy material,
2	MOQ	100pcs
3	size	as your requirement
4	technical	hand-made and machinery
5	finished	PU self-skin
6	payment term	T/T
7	packing	Normal export corrugated carton as per clients' request
8	usage	floor mat, kitchen mat
9	Custom service	Dimension, material, style all can be custom made
10	delivery time	40 days after receiving the deposit
11	remarks	Your satisfaction is our greatest affirmation and if you have any problems please contact us.

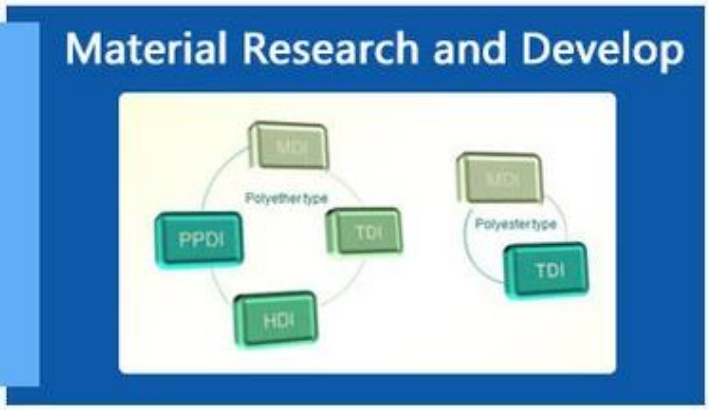
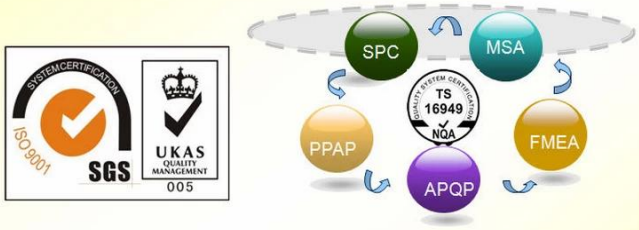
Quality control

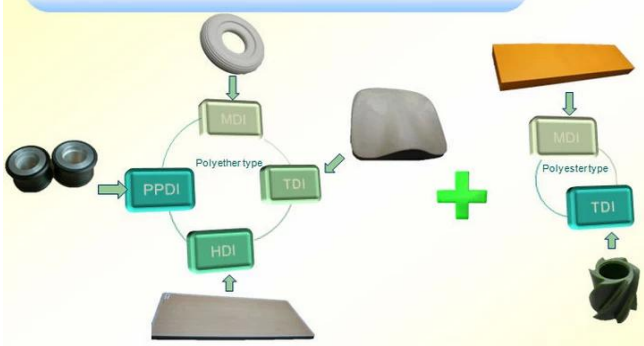


- **I. Quality Management**



◆Through the continuous push, maintenance and periodic review for the quality management system of ISO9001, ISO/TS 16949, to ensure the system works sufficiently, appropriately and effectively.
◆Five core tools of ISO/TS 16949 : APQP, FMEA, MSA, SPC and PPAP. The effective use of these five core tools can make our quality control and overall management level improved greatly, finally to meet the requirements of customer.

- **II. Material Research and Develop**



◆Under a professional PU material R&D team, the products that has been put into production include MDI, TDI, HDI and PPDI etc polyether and polyester system formula, which covering all PU systems formula.

FAQ

1. What are the advantages of choosing Finehope?

1. 1. Product quality assurance, delivery guarantee, good after-sales service
2. 2. Cost-effective, fast development efficiency, professional operation with integrity
3. 3. Finehope will conduct all testing analysis and then work out testing standards to reduce quality standard dispute between customers and manufacturers.
4. 4. Lean production management mode.
5. 5. Help customers develop and design new products.
6. 6. Has rich experience in the design and processing of pu products.
7. 7. Finehope is a high-tech enterprise in China with domestic and international invention patents technology and intellectual property.

2. What are the differences between Finehope and domestic peers?

1. 1. Quality assurance: advanced product quality planning(APQP).
2. 2. Finehope has rich experience in serving international large enterprises.
3. 3. Has professional scientific research team of polyurethane material.
4. 4. Has independent design, manufacturing and innovation ability of production equipment and molds.

5. 5. Has engineer team who is responsible for the quality assurance system and quality control.

3. What are the differences between Finehope and European and U.S peers?

1. 1. Has sound and mature supporting supply chain
2. 2. Lower mold costs
3. 3. High efficiency of development and design ability and short process time.
4. 4. Cost effective and good service attitude.

4. Why you choose Finehope?

1. Finehope is the most professional pu manufacturer in China, which has a professional R & D team, advanced PU production equipment, professional testing equipment and perfect quality management system. We have 12-year cooperation experience with CAT, FIAT, TVH, GGP and other famous enterprises. We provide them with one-stop service from R & D to production to satisfy their customization needs.

Please do not hesitate to contact me if you have interesting in our products.
