

Feature:

1.

[1. High strength and high modulus](#)
2.

[2. High impact resistance](#)
3.

[3. High temperature resistance](#)
4.

[4. High corrosion resistance](#)
5.

[5. High wear resistance](#)

Specification

1. The material is made of high quality polyurethane (PU) and has excellent mechanical properties, high strength and high modulus, and high impact resistance.

2. The material has excellent thermal stability and high temperature resistance, and can maintain its mechanical properties at high temperatures.

3. The material has excellent chemical stability and high corrosion resistance, and can resist the corrosion of various acids, alkalis, and solvents.

4. The material has excellent wear resistance and high abrasion resistance, and can maintain its mechanical properties after long-term use.

5. The material has excellent electrical properties and high insulation performance, and can be used in various electrical applications.

1	Material	Polyurethane (PU)
2	MOQ	100
3	Color	Black
4	Thickness	1mm
5	Weight	1.2kg/m ²
6	Temperature	-20°C to 120°C
7	Corrosion	Resistant to acids, alkalis, and solvents
8	Wear	High wear resistance
9	Electrical	High insulation performance
10	Lead time	40 days
11	Payment	T/T, L/C, D/P, etc.

Quality control

Quality Management

Material Research and Develop

I. Quality Management

- ◆Through the continuous push, maintenance and periodic review for the quality management system of ISO9001, ISO/TS 16949, to ensure the system works sufficiently, appropriately and effectively.
- ◆Five core tools of ISO/TS 16949 : APQP, FMEA, MSA, SPC and PPAP. The effective use of these five core tools can make our quality control and overall management level improved greatly, finally to meet the requirements of customer.

II. Material Research and Develop

- ◆Under a professional PU material R&D team, the products that has been put into production include MDI, TDI, HDI and PPDI etc polyether and polyester system formula, which covering all PU systems formula.
