 Customer: CUSTOMER SERVICE DEPARTMENT

Test Result

No.	Test Item	Unit	Test Standard	Customer Requirement	Customer Sample (unit)	Customer Sample (unit)	
				1	2	Average	
1	Thickness	mm	ASTM D2014-2011	1.5	1.5	1.5	1.5
2	Hardness	HRB	ASTM D2014-2011	80	80	80	80
3	Specific Gravity	g/cm ³	ASTM D2014-2011	0.95	0.95	0.95	0.95
4	Tensile Strength	MPa	ASTM D2014-2011	15	15	15	15
5	Elongation	%	ASTM D2014-2011	100	100	100	100
6	Impact	J/m ²	ASTM D2014-2011	10	10	10	10
7	Resilience	%	ASTM D2014-2011	10	10	10	10

FIG:

- In order to make the strength of two steel rods can be compared, set of the test specimen in the same thickness (about 10mm) and test area in one side to do the tensile strength test comparison.
- For the specific gravity value in the above test result, it is the value of specimen with size in one side, not the actual value of the whole sample.

False welding 假焊	Lack of strength, affect the use of function 强度不足，影响使用功能		9	A	Current, voltage, welding angle, speed setting is not reasonable 电流、电压、焊接角度、速度设置不合理	4	● Welding process guidance making 制定焊接工艺指导书 ● Condition confirmation check 对条件进行检查 ● Confirm the failure test on a regular basis 定期对失效测试进行确认	Destructive testing 破坏性试验	8	288	After the procedure is set up to confirm the processing conditions, the execution and marking of the failure test is performed. 工序设置完成后确认		9	3	4	108

Production Device

KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM) High Pressure Machine KRAUSS MAFFEI Made in Germany!

Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.
