## Specification

PU (PU) is a high-quality material used for building materials. It is made of polyurethane resin, which is a type of plastic. It is known for its durability, resistance to wear and tear, and its ability to withstand harsh weather conditions. It is often used for decorative elements, such as columns, capitals, and base. It is also used for furniture, such as chairs, tables, and benches. The material is easy to install and maintain. It is also eco-friendly and sustainable. It is a popular choice for architects and designers. It is a versatile material that can be used in a wide range of applications. It is a high-quality material that is suitable for both indoor and outdoor use. It is a durable material that can last for many years. It is a good choice for anyone looking for a high-quality building material.

## Products applications

## Our company

Finehope 2002 年 在 中 国 成 立 了 一 家 有 限 公 司 ， 32.The 公 司 的 总 面 积 为 7000 平 方 米 ， 总 投 资 额 为 4100 万 元 人 民 币 ， 公 司 的 总 面 积 为 1,000m2 的 办 公 楼 。

# Quality control

### I. Quality Management

- ◆ Through the continuous push, maintenance and periodic review for the quality management system of ISO9001, ISO/TS 16949, to ensure the system works sufficiently, appropriately and effectively.
- ◆ Five core tools of ISO/TS 16949 : APQP, FMEA, MSA, SPC and PPAP. The effective use of these five core tools can make our quality control and overall management level improved greatly, finally to meet the requirements of customer.

## II. Material Research and Develop

◆ Under a professional PU material R&D team, the products that has been put into production include MDI, TDI, HDI and PPDI etc polyether and polyester system formula, which covering all PU systems formula.
