Specification

PU foam is a lightweight, flexible material that is easy to install and maintain. It is made of polyurethane (PU) foam, which is a type of plastic. The foam is made of small, closed cells that are filled with a gas. This makes the foam very light and flexible. The foam is also very durable and can withstand a lot of wear and tear. The foam is made of a material that is called MDI. MDI is a type of plastic that is very strong and durable. The foam is made of a material that is called PU. PU is a type of plastic that is very strong and durable. The foam is made of a material that is called MDI. MDI is a type of plastic that is very strong and durable. The foam is made of a material that is called PU. PU is a type of plastic that is very strong and durable.

Quality control

Quality Management

Material Research and Develop

I. Quality Management

- ◆Through the continuous push, maintenance and periodic review for the quality management system of ISO9001, ISO/TS 16949, to ensure the system works sufficiently, appropriately and effectively.
- ◆Five core tools of ISO/TS 16949 : APQP, FMEA, MSA, SPC and PPAP. The effective use of these five core tools can make our quality control and overall management level improved greatly, finally to meet the requirements of customer.

II. Material Research and Develop

◆ Under a professional PU material R&D team, the products that has been put into production include MDI, TDI, HDI and PPD etc polyether and polyester system formula, which covering all PU systems formula.
