3D Design

Product Inspection Standard Setting

Free Product Inspection Standard Setting:
In addition to the usual quantification of product physical properties and appearance standards, we will add REACH, RoHS, FDA, CA-65, or CFC Free to the standards according to customer needs.

Free Mould Opening:
Large order quantity with mould cost free.

Free 3D Design:
Finehope help customer design the desired product or modify the design for free.

Free DFM/A Report:
Finehope will show details and solutions of manufacturability and assemblability through PPT to help customers reduce trouble.

In de fabriek op maat gemaakte babyluiermat voor baby's met hoge dichtheid

Categorie: PU pad, mat

Materiaal: PU Polyurethaan - Integraal huidschuim

Dichtheid: 200-250kg/m³

Vorm: volgens klantvereisten voor productontwerp en aangepaste mal

Kleur: zwart, grijs en andere kleuren kunnen op verzoek worden aangepast.

Verpakking: Standaard doos

Betalingsvoorwaarden: 30% aanbetaling, betaling en levering.

MOQ: 1.000 stuks

Verzendlocatie: China • Fujian • Xiamen

Voldoen aan de certificering: RoSH, REACH, EN71-3, ftaalzuur 6P

Overig: Chinese OEM- en verwerkingsfabrieken, gespecialiseerd in de productie van PU-producten, inclusief accessoires (ijzer, hout, plastic, enz.).

Finehope heeft sinds 2003 continu het ISO 9001-certificaat behaald.

IATF16949-certificering:

Finehope is in 2021 geslaagd voor de IATF16949 Automotive Quality Management Systems-certificering. Meer dan 50 documenten garanderen de voortgang van de ontwikkeling van nieuwe producten, de kwaliteit, levertijd en kosten van proef- en massaproductieproducten. Sinds de samenwerking tussen Finehope en Caterpillar in 2007, heeft Finehope het autokwaliteitsmanagementsysteem gebruikt voor de introductie van nieuwe producten, met behulp van de vijf tools van SPC, MSA, FMEA, APQP en PPAP, die lof hebben gekregen van Caterpillar executives en een lange -termijn partnerschap tot nu toe.

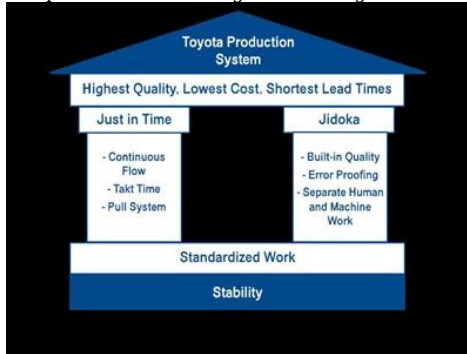

Our Advandages

Onderzoeks- en ontwikkelingsmogelijkheden voor PU-grondstoffen

Sinds 2002 legt Finehope zich toe op het ontwerp en de fabricage van PU-vormschuimproducten. Onafhankelijk onderzoek en ontwikkeling van formulematerialen en een stabiele productiecapaciteit vormen de basis voor kwaliteitsborging.

Finehope kan de productformule op elk moment aanpassen aan de aangepaste behoeften van gepersonaliseerde producten van klanten, zoals de vereisten voor hardheid, elasticiteit, ondersteuning, gevoel, dichtheid, kleur en andere fysische en chemische eigenschappen, en kan formuleringsvereisten stellen in overeenstemming met de wet- en regelgeving van verschillende landen. Natuurlijk moet een goede formule ook rekening houden met de beste kostenprestaties. Voor nieuwe projecten is het vermogen om PU-formuleringen te ontwikkelen een belangrijke voorwaarde om de kwaliteit, levertijd en kosten van productontwikkeling te waarborgen.

Wetenschappelijk beheersvermogen

Finehope benadrukt het belang van het Toyota Production System en het Corporate Coaching Model om de managementefficiëntie te optimaliseren. Continue verbetering de efficiëntie en kwaliteit van alle medewerkers, management en productiepersoneel zijn effectief en continu verbeterd, management- en productiekosten zijn continu verlaagd, maar belangrijker dan efficiëntie en kosten is het cultiveren van personeelsgroei door continue verbetering, omdat dit de kern is van duurzame bedrijfsontwikkeling.

Ontwerp en fabricagemogelijkheden van automatiseringsapparatuur

Het vermogen van Finehope om automatiseringsapparatuur te ontwerpen en te produceren is zeldzaam in de industrie. Door deel te nemen aan het ontwerp van nieuwe PU-injectiemengapparatuur en de automatiseringstransformatie van de productielijn, om ervoor te zorgen dat onder de concurrentie van het demografische dividend van China wordt vermindert en arbeidskosten blijven stijgen, de productie-efficiëntie kan ook worden verbeterd, arbeids- en materiaalkosten kunnen worden verlaagd. Bovendien zijn de continue ontwerp- en fabricagemogelijkheden van belangrijke apparatuur zoals armaturen, speciale apparatuur en automatische matrijzen ook de redenen waarom Finehope in alle opzichten een leidende positie inneemt.

Het vermogen van Finehope om voortdurend kosten te verlagen en producten te innoveren, kan klanten helpen meer waarde te creëren. Daarom is het een betrouwbare langetermijnpartner van veel Fortune 500-bedrijven en toonaangevende bedrijven in de branche.

De verfijning van Finehope vermindert de problemen voor klanten, omdat het de nalatigheid van het menselijke processysteem vermindert en de mogelijkheid om continu professionele ervaring op te doen, wat ervoor kan zorgen dat alle nieuwe projecten in de kortst mogelijke tijd worden voltooid.

FAQ

1. Waarom kies je voor Finehope?

Finehope is de meest professionele PU-fabrikant in China, met een professioneel R&D-team, geavanceerde PU-productieapparatuur, professionele testapparatuur en een perfect kwaliteitsmanagementsysteem. We hebben 12 jaar samenwerkingservaring met CAT, FIAT, TVH, STIGA en andere bekende ondernemingen. We bieden hen service in één stap, van R&D tot productie om aan hun aanpassingsbehoeften te voldoen.

2. Wat zijn de voordelen van het kiezen van Finehope?

- 1) Productkwaliteitsborging, leveringsgarantie, goede service na verkoop.
- 2) Kosteneffectieve, snelle ontwikkelingsefficiëntie, professionele bediening met integriteit.
- 3) Finehope zal alle testanalyses uitvoeren en vervolgens testnormen uitwerken om geschillen over kwaliteitsstandaarden te verminderen klanten en fabrikanten.
- 4) Lean-modus voor productiebeheer.
- 5) Help klanten om nieuwe producten te ontwikkelen en te ontwerpen.
- 6) Heeft een rijke ervaring in het ontwerpen en verwerken van PU-producten.
- 7) Finehope is een hightech onderneming in China met binnenlandse en internationale uitvindingsoctrooien, technologie en intellectueel eigendom.

3. Wat is het verschil tussen Finehope en huisgenoten?

- 1) Kwaliteitsborging: geavanceerde kwaliteitsplanning (APQP).
- 2) Finehope heeft een rijke ervaring in het bedienen van internationale grote ondernemingen.
- 3) Heeft een professioneel wetenschappelijk onderzoeksteam van polyurethaanmateriaal.
- 4) Heeft een onafhankelijk ontwerp-, productie- en innovatievermogen van productieapparatuur en matrijzen.
- 5) Heeft een ingenieursteam dat verantwoordelijk is voor het kwaliteitsborgingssysteem en de kwaliteitscontrole.

4. Wat zijn de verschillen tussen Finehope en Europese en Amerikaanse collega's?

- 1) Heeft een perfecte en volwassen ondersteunende toeleveringsketen.
- 2) Lagere vormkosten.
- 3) Hoge efficiëntie van ontwikkeling en ontwerpvermogen en korte procestijd.
- 4) Kostenvoordeel en goede service instelling.

5. Wat zijn de toepassingen van PU-producten?

Auto's, technische machines, sportfitnessapparatuur, medische machines en dagelijkse huishoudelijke artikelen, enzovoort.

About us

Our Certification

Alibaba Verified Supplier Certificate

Since 2007, Finehope has continuously passed TUV certification and has become an Alibaba Verified Supplier. Verified Supplier is a high-quality supplier verified by the authoritative strength of Alibaba platform. Through online and offline on-site audits, the merchants' corporate qualifications, product qualifications, corporate capabilities, and other comprehensive strengths are reviewed and verification.

Integration of Informationization and Industrialization Management System Certificate

The certificate is assessed by the Xiamen Municipal Government and issued by the Shanghai Academy of Quality Management Science. This certificate reflects the level of Finehope's in-depth integration of informatization and industrialization. Finehope will continue to take a new path of industrialization; use information technology as the support to transform and upgrade traditional kinetic energy, cultivate new kinetic energy, and pursue a sustainable development model.

Xiamen Growth-oriented Micro, Small & Medium Enterprises

Finehope has been rated as "Xiamen Growth-oriented Micro, Small & Medium Enterprises" since 2019. It is the scoring result of the Xiamen Municipal Government based on Finehope's various comprehensive indicators, growth models, brand strength in the industry, and good corporate reputation, then issue this certificate. It is a proof that Finehope stands out among thousands of small and medium-sized enterprises in the city.

Work Safety Standardization Certificate

Manufacturing safety is important to prevent or lessen the risk of workplace injury, illness, and death.

Finehope General Manager Tiger Side: "Only those manufacturing facilities which continue to emphasize safety as a top-level issue will remain highly productive and competitive in today's marketplace."

Finehope must be proactive about employee safety. Without a focus on safety, can place their employees at risk, cause fire and face expensive property damage and affect delivery.

Xiamen Science And Technology Little Giant Leading Enterprise

Since 2019, Finehope has been selected as the leading company of Xiamen Science and Technology Little Giant. This certificate was jointly issued by five departments of the Xiamen Municipal Government. The selection criteria focus on strategic emerging industries such as new generation information technology, high-end equipment, new materials, new energy, biology and new medicine, energy saving and environmental protection, and marine high-tech. Winning this honor shows that Finehope is at the forefront of the industry in new information technology and new materials.

Fujian Province Pollution Discharge Permit

Pollution discharge permits are the "identity cards" of all entities involved in the discharge of pollutants and are issued by the Xiamen Municipal Environmental Protection Bureau. General Secretary Xi Jinping emphasized that "the ecological environment should be protected like the eyes, and the ecological environment should be treated like life." Premier Li Keqiang said: "Environmental pollution is a hazard to the people's livelihood and the pain of the people's hearts. It must be dealt with an iron fist." The Chinese government's determination to improve the environmental quality of the atmosphere, water bodies, and soil cannot be ignored. Pollution permits are an important factor that must be considered in international procurement. Otherwise, the factory has hidden dangers and will be ordered to stop production, which will affect the delivery date. It can be seen that Finehope is a manufacturer with long-term cooperation and stable delivery.

Xiamen Specialized, Refining, Differentiate, Innovative SMEs

Finehope has been rated as "Xiamen Specialized, Refining, Differentiate, Innovative SMEs" since 20-20. "Specialized, Refining, Differentiate, Innovative" refers to SMEs with outstanding main business, strong professional capabilities, strong R&D and innovation capabilities, and development potential. Mainly concentrated in the new generation of information technology, high-end equipment manufacturing, new energy, new materials, biomedicine and other mid-to-high-end industries. Leading in the same industry in terms of market, quality, efficiency or development, with advanced and exemplary.

Through this certificate, the government emphasizes and recognizes finehope's "specialization, special innovation" is to encourage innovation and achieve specialization, reform, and specialization. Finehope should continue to take "specialization, special innovation" as the direction, focus on their main business, practice hard work, strengthening innovation, and build the company into a "single champion" or "supporting expert" with unique skills.

FDA certification

Food and Drug Administration (FDA) established in 1906 is a government agency under the passage of the Federal Food and Drugs Act. The FDA Certification is mandatory for placing the products in the USA. This major responsibility of FDA is protecting and managing public health and related authorities by assuring the safety and security of human and biologically generated product. The FDA regulates products including biological products, medical services, cosmetics, prescription drugs and non-prescription drugs, veterinary drugs, tobacco and other radiation emitting products. Finehope has passed FDA certification every year since 2018. FDA approval means that the products produced by Finehope have obtained foreign government certificates (CFG) and can enter the global market smoothly.

Production Device

KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM) High Pressure Machine
KRAUSS MAFFEI
Made in Germany!

Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic P-U injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.

Social Responsibility

- **Audited by Sedex**

(Supplier business ethics information exchange)

Labor standard · health and safety · Environmental protection · Business ethics practice
