## I. Introduction

### 1. Features

**China PU Railing Manufacturers, China PU railings manufacturers, Chinese pu railing factory**

#### **Rigid foam features:**

1. High strength, light weight, good flexibility and toughness;
2. the insulation effect is good, no distortion, no shedding, durable and strong;
3. With wood, planing, nailing, sawing characteristics;
4. modeling diverse, we can demand, custom mold according to the customer;
5. The surface color can be processed according to customers favorite color;
6. Wood effect: natural wood grain effect clear, elegant and luxurious;
7. Anti-retardant, after special treatment, can reach no spontaneous combustion, no combustion properties;
8. The reinforcing filler can be placed;

### 2, the product uses

#### **Hard substance (structural foam) products (widely used:**

- 1, the furniture industry: frame, bed frame, frame, wardrobe / cupboard / decoration, chair / chair legs carved door;
- 2, construction and decoration materials: steel, street junction box, a small statue / sculpture, carved pillars;
3. Automotive: interior, rear luggage cover, automobile exhaust cover, trunk lid hard truck, trailer side / hats etc;
- Sports Equipment: hockey sticks, skis, skid plates, a fish, a racket handle;
5. Insulation: freezer refrigerator foam insulation board / inside the incubator;
6. Other general purpose: cedar sculpture carved picture frames, trays, computer / television / radio housing,

engineering parts, decorative materials;

## Second, with regard us

### 1 Introduction

- Leading manufacturer of polyurethane products manufacturers we are molding, was established in 2002. Our products are mainly exported to European and US markets.
- We have a professional production of polyurethane products as the goal, high-quality requirements. The main reason customers choose us saw our extensive R & R & D capability and international brand companies, and to ensure long-term experience in transportation quality; amplifier.
- Division I after the Swiss SGS certification ISO9001-2008, in accordance with the TS16949 system of quality control. Lean is we have been pursuing the goal to reduce waste, create added value, sustained commitment to helping our customers to control costs and create more value.

### 2, our brand customers

Distributed in various regions and industries the Americas, Europe, Asia ..... welcome you, thank you!

### 3 Our Advantages

Through the company's ISO9001 A. Quality Management, continued to promote the ISO / TS 16949 quality management system, maintain and regularly reviewed to ensure their full, proper and effective functioning;

ISO / TS 16949 five core tools: the effective use of APQP, FMEA, MSA, SPC, PPAP, our quality control and overall management level has been greatly improved, and ultimately to meet customer requirements.

B. materials research and development of polyurethane materials have a professional R & amp; R & D team has been put into the products, including MDI, TDI, HDI, and PPDI and other polyether, polyester formulation system, covering

all polyurethane systems formulations.

C. production equipment improved apparatus capable of self-improvement and self-designed research Jidoka mold fixture from eastbound lean meat.

D. Toyota's lean TPS lean management model used in the production, increase productivity, reduce waste and reduce costs.

• PU Foaming Equipment  
PU(聚氨酯) 发泡设备

#### 4, our production

- There PU industry's most advanced production equipment, including KraussMaffei injection molding machines and high / low-pressure perfusion machine different PU products and other production materials;
- Automated assembly line operations, including perfusion lines, painting lines, polishing line, because the line shake mode.
- A separate mold design, processing and production experience, innovation, and a wealth of design and metal, plastic and other parts of the PU;

## 5, our testing equipment

- Finehope PU material with testing equipment, and specialized quality assurance and quality control engineers.
- Finehope will carry out the test product analysis, mechanical analysis of products and materials, and ultimately the development of test products. Thereby reducing the quality standards and customer disputes between manufacturers.

## 6, our certificate

- Finehope as Huaqiao University, Xiamen University and the polyurethane product research and postgraduate training base station.
- Finehope domestic high-tech enterprises, with a number of domestic and foreign patents polyurethane intellectual property invention.
- Finehope passed ISO9001 certification, Ali Baba, Ali Baba is a boutique firm Prudential businesses.

## Third, FAQs

### 1) Why did you choose Finehope

Finehope is China's most professional manufacturer of PU, has a professional R & amp; R & D team, advanced PU production equipment, professional testing equipment and perfect quality management system. Our well-known enterprises CAT, Fiat, TVH, GGP and so has 12 years of experience of cooperation. Division I provide them with one-stop service from the production and customized to meet their needs.

### 2) Select Finehope benefits

Reduce your time, reduce personal problems, reduce costs (explicit and implicit costs).

### 3) product delivery cycle

Receive the deposit and 30 days to complete, complete mold production, production and equipment without having to queue for 10 days (according to the order quantity).

### 4) transport of goods

Qiyun, shipping, air transport (FedEx / UPS), depending on customer requirements.

### 5) How to track cargo transport

If the bill of lading ocean bill would provide to the customer, if it is to provide rapid air waybill number.

## 6) How good product quality control

Quality first, to provide customers with high quality products is our mission. A professional team from the beginning to the end, a good product quality control:

- All raw materials before production parts must go through rigorous testing;
- All the workers must go through a trial production of formal training;
- All products must pass strict control and inspection in the production process;
- All products before shipment must be checked again.
