

Quick Details

Place of Origin: Fujian, China

Brand Name: FINEHOPE

Model Number:

Tire Design: Radial

Type: Solid Tire

Diameter: < 11inch

Width: <165mm

Product Name: Wheel chair parts, truck tire, PU wheel chair tire

Size: Customized

Color: Customized

Style: Fill tire, stroller tires

Usage: stroller tires & carriage tire & wheelchair tires

Material: Polyurethane(PU)

Certificate: ISO quality test

Features of wheels

No inflatable (filled PU material instead of the tube), strong bearing capacity;

Strong wear resistance, is 6 times the rubber tires.

Lightweight durable, heat resistant, cold resistant, corrosion resistance, good elasticity (minus 40 to maintain the original elasticity);

Not afraid of nail bar, explosion-proof, anti bar, long service life;

Product resistance to yellowing (3.5), anti aging, can be made into a variety of colors;

Good resilience;

Environmentally friendly products (no fluoride, no heavy metals, in accordance with REACH, ROHS), energy saving and safety, can be degraded.

Specifications

1. Smooth and clean appearance pu foam wheel
2. Wheel barrow inflation-free tire, Durable Roller bearing
3. Anticorrosion, damp-proof, anti-crack, mothproof, anti-ultraviolet pu tire
4. Light weight and durable, heat/cold resisting, corrosion resistant and good elasticity
5. No radiation, non-toxic and eco-friendly features solid tire
6. Light container shipping and easy to transport
7. The products are environmental, biodegradable which can preserve the ecological environment

Name Durable Environmentally Friendly PU Tire of High Quality

Material Polyurethane(PU)

Color Customized

MOQ 100pcs polyurethane wheels

size Customized

finished PU self-skin

payment terms T/T

package PE bag and carton

usage Stroller tires & Wheelchair wheels & Truck tires and so on

Sample Time 10days

Lead Time 30days

Brand name Finehope

Certificate ISO 9001

A Breif Introduction About Our Company

Our company is at the leading edge of China's polyurethane manufacturing industry, we currently own 12 pieces of professional high and low polyurethane injection equipment which have been imported from Italy and Germany. We also own 5 independent and continuous production lines.

Our polyurethane manufacturing capacity allows us to create product weights in the range of 1-9,000 grams, and sizes in the range of 1-2,600 millimeters. All of our products are of preeminent quality standards, and as a result, we have never received a return shipment from a client.

We believe that our quality, reliability, and favorable prices will be attractive to any company looking for a production-capacity manufacturer for polyurethane and other products.

2, our brand customers

Located in various regions and industries the Americas, Europe, Asia welcome your visit, thank you!

3, our advantage

A. Quality management through the company ISO9001, ISO / TS 16949 quality management system continued to promote, maintain and regularly reviewed to ensure their full, appropriate and effective operation;

ISO / TS 16949 five core tools: effective use of APQP, FMEA, MSA, SPC, PPAP, so that our quality control and overall management level have been greatly improved, and ultimately to meet customer requirements.

B. materials research and development of polyurethane material has a professional R & D team has been put into products, including MDI, TDI, HDI, and PPDI and other polyether, polyester systems formula, covering all polyurethane systems formulations.

C. improved equipment for production equipment has the ability to self-improvement and self-designed research Jidoka mold fixture, lean from Dong line.

D. Toyota's lean production using TPS lean management model to improve production efficiency, reduce waste and reduce costs.

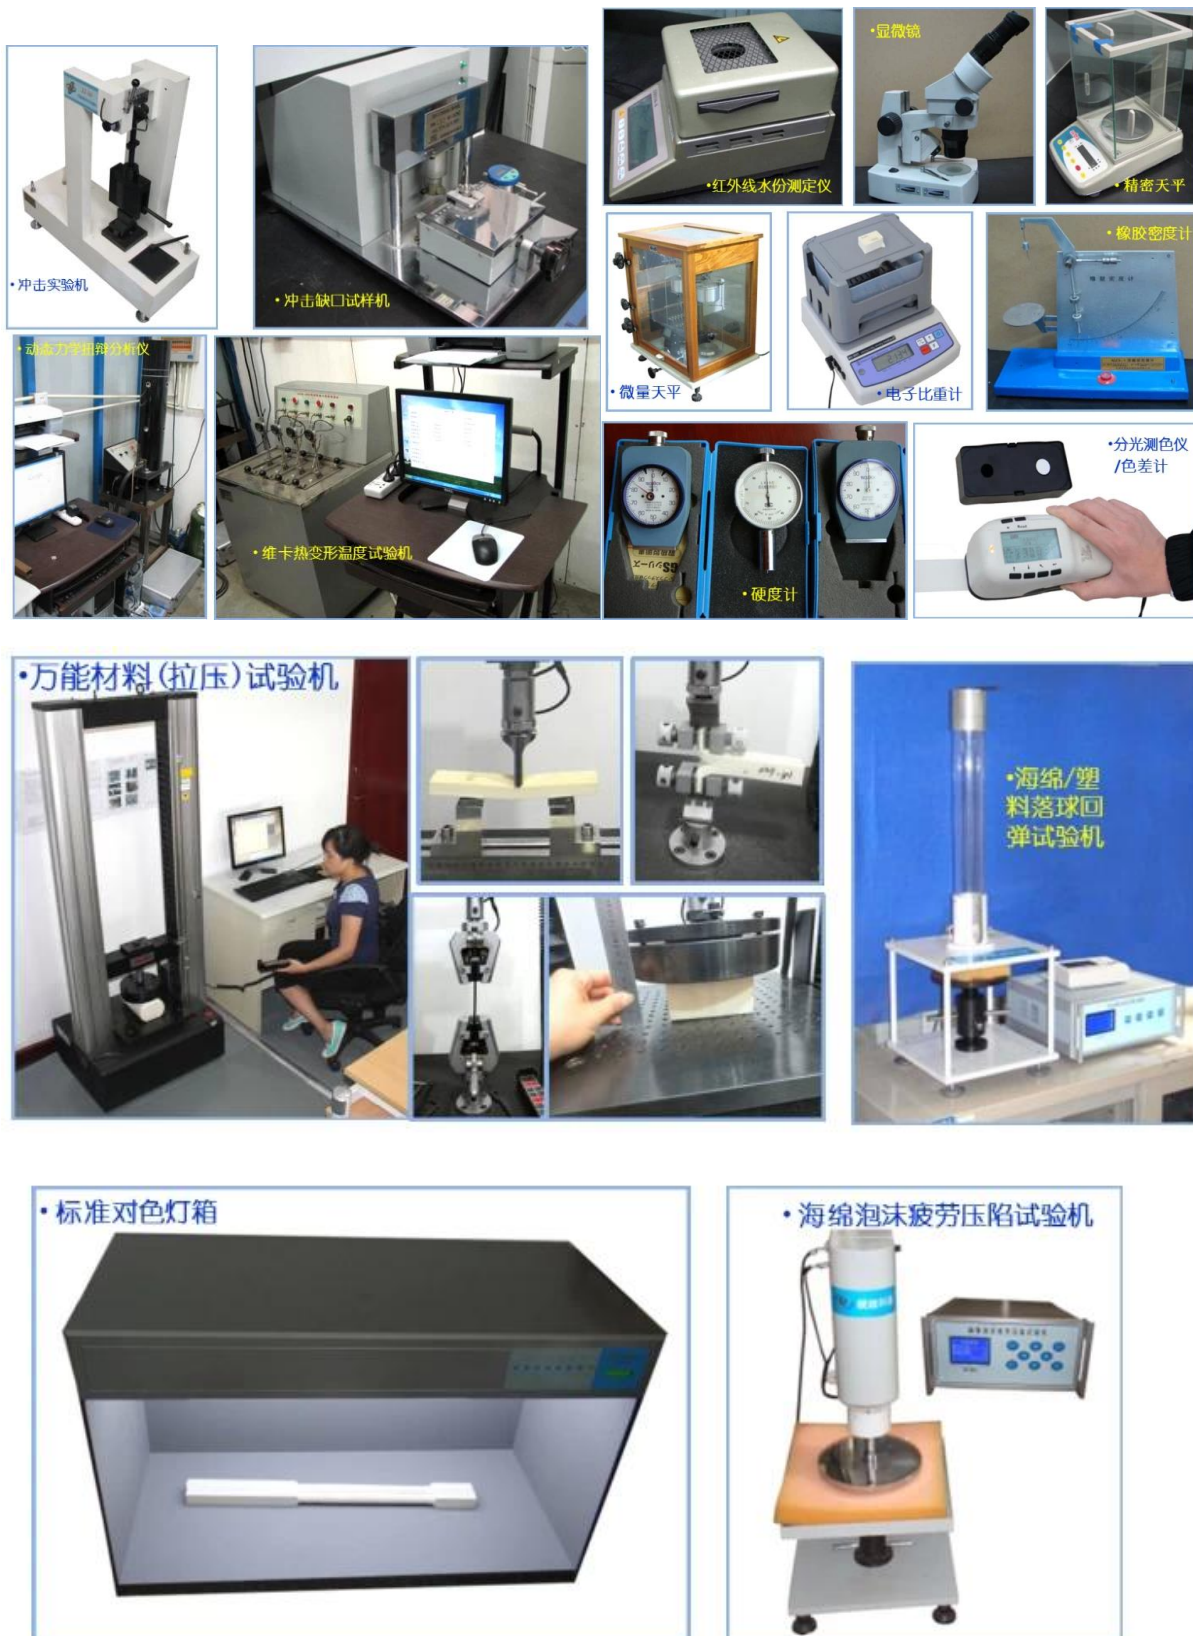

4, our production

- Has PU industry's most advanced production equipment, including KraussMaffei machines and other production materials of different PU products of high / low pressure perfusion machines;
- automated assembly line operations, including perfusion lines, painting lines, polishing lines, since shaken mold lines.
- have independent mold design, production, the ability to innovate, and a wealth of experience in the design and processing of metal, plastic and other parts of the PU;

5, our testing equipment

- Finehope PU material has a range of testing equipment, and dedicated quality assurance system and quality control engineers.
- Finehope will carry out the testing product analysis, mechanical analysis products and materials, and ultimately develop a test product. Thereby reducing the quality standards disputes between customers and manufacturers.

6, we certificates

- Finehope as Huaqiao University, Xiamen University and the polyurethane product research and postgraduate training base station.
- Finehope domestic high-tech enterprises, with a number of domestic and foreign patents polyurethane intellectual invention.
- Finehope passed ISO9001 certification, Alibaba, Alibaba is also a boutique company Prudential enterprises.

FAQ

1. Why choose Finehope?

Finehope is the most professional PU manufacturer in China, which having a professional research and development team, advance PU production equipments, specialized testing equipments and well-established quality management system. We have building cooperation with international brand ,such as CAT, FIAT, TVH, GGP, for twelve years. We provide comprehensive services for customers, from research to production and meet individual customized need of customers.

2. Benefit of choosing Finehope?

Save your time, reduce your troubles and costs (explicit and implicit).

3. What's your lead time?

30 working days is needed after opening the mould, not including the material preparation (depends on the order quantity).

4. What's your shipment method?

By sea or by air (Fedex /UPS), decided by the customer.

5. How to track the package's transportation?

Provide the B/L No. to customer if by sea, tracking No. to customer if by air.

6. How does your factory do regarding quality control?

Quality is priority! To provide our customer good quality products is our basic mission. A professional team always keeps the quality control from the beginning to the end:

- 1) All raw material used are inspected before producing.
- 2) All workers take formal training before starting job.
- 3) All products during production process are controlled and inspected.
- 4) All products are inspected before shipped out from the factory.
