

Hot sale high density pu foam baby diaper changing pad for baby

Category: Rubber PU, PU pad, mat

Material: PU Polyurethane - Integral skin foam

Density: 200-250kg/m³

Shape: According to customer requirements for product design and custom mold

Color: black, gray and other colors can be customized on request.

Packaging: Standard carton

Payment Terms: 30% deposit, payment and delivery.

MOQ: 1,000pcs

Shipping Location: China • Fujian • Xiamen

Meet the certification: RoSH, REACH, EN71-3, phthalic 6P

Other: Chinese OEM and processing factories, specializing in the production of PU products, including accessories (iron, wood, plastics, etc.).

FREE			
DFM / a report	Free 3D design	Free Mold opening	Standard product inspection setting
Finehope. will show details and solutions of productivity and assemblability Through PPT to help customers reduce trouble.	Finehope helps the customer to design the desired Product or change the design for free.	Large order Quantity with the cost of the free mold.	In addition to the usual quantification of Physical properties of the product and standard lookings, we will add to reach, ROHS, FDA, CA-65 or CFC free to standards based on customer needs.

ISO 9001 certificate.

Finehope has Obtained the ISO 9001 certificate uninterruptedly since 2003.

leading companies in the sector.

2.

PU raw material research and development capacity

Since 2002, Finehope has State engaged in the design and production of printed foam products in PU. Independent research and development of formula and stable production materials Capacity is the basis for quality assurance.

Finehope can adjust the Product formula at any time based on the customized customers' needs Customized products, such as requirements for hardness, elasticity, support, sensation, density, color and other physical and chemical properties and It can make the requirements of formulation in accordance with the laws and regulations Of various countries. Of course, a good formula must also consider the best cost performance. For new projects, the ability to develop PU formulations is a Key conditions to guarantee the quality of product development, delivery times and cost.

3

Scientific management capacity

Finehope emphasizes the Importance of Toyota production system and business coaching model A Optimize management efficiency. Continuous improvement efficiency and The quality of all employees, management and production personnel have been Effective and continuously improved costs, management and production have State continuously reduced, but more important than the efficiency and cost is the Cultivation of the growth of employees through continuous improvement, because this is The core of sustainable corporate development.

Finehope 's aging Reduces the problem for customers, because it reduces negligence on Human process system and ability to accumulate continuously professional experience, which can guarantee that all new projects are completed in The shorter time.

Finehope 's aging Reduces the problem for customers, because it reduces negligence on Human process system and ability to accumulate continuously professional experience, which can guarantee that all new projects are completed in The shorter time.

4

Enterprise Digital. functionality

Finehope has invested strongly in the research and development of software systems to digitize Management of business processes and industrial production. Digital The transformation allows

Finehope to use new technologies to allow customers to have a more positive experience, while reducing the workload of the Company Employees and ultimately reducing costs.

7 Aspects Define a Digital Enterprise

Famous customer

Cooperation experience

Faq

1. Why choose Finehope?

Finehope is the most professional PU manufacturer in China, which has a professional research and development team, advanced PU production equipment, professional test equipment and perfect quality management system. We have a 12-year cooperation experience with CAT, FIAT, TVH, GGP and other famous companies. We provide them with a R & D one-step service to production to meet their customization needs.

2. What are the advantages of choosing Finehope?

- 1) Product quality assurance, delivery guarantee, good after-sales service.
- 2) Convenient efficiency and rapid development efficiency, professional operation with integrity.
- 3) Finehope will conduct all test analyzes and then process the test standards to reduce the quality standard dispute between customers and producers.
- 4) Slender production methods.
- 5) Help customers develop and design new products.
- 6) It has a rich experience in the design and processing of PU products.
- 7) Finehope is a high-tech company in China with international patent technology in invention and intellectual property.

3. What is the difference between Finehope and domestic peers?

- 1) Quality insurance: Advanced quality planning (APQP).
- 2) Finehope has a rich experience in serving large international companies.
- 3) has a professional scientific research team of polyurethane material.
- 4) has a design capacity, production and independent innovation of production equipment and molds.

5) has a team of engineer responsible for quality assurance system and quality control.

4. What are the differences between Finehope and European colleagues and u.s?

- 1) has a perfect and mature supply chain.
- 2) lower costs of the mold.
- 3) High efficiency of the development and design capacity and short process times.
- 4) advantage of costs and good service attitude.

5. What are the applications of the products PU?

Cars, engineering machines, sports fitness equipment, medical machines and daily home items and so on.

Activities

Our Certification

Alibaba Verified supplied. Certificate

Since 2007, Finehope has continuously exceeded TUV certification and has become an alibaba Verified supplier.

Verified The supplier is a high quality supplier verified by the authoritative force of Alibaba platform. Through online and offline on-site audits, merchanti ' Company qualifications, product qualifications, corporate skills and Other complete strengths are reviewed and verification.

Integration of Certificate of the Information and Industrialization Management System

The certificate is evaluated by the municipal government of Xiamen and released by the Shanghai Academy of quality management science. This certificate reflects the level of The in-depth integration of Finehope of computerization and industrialization. Finehope will continue to take a new industrialization path; Use the information technology as a support to transform and update traditional kinetic energy, It cultivates new kinetic energy and pursue a sustainable development model.

Xiamen. Micro-oriented growth, small and medium-sized enterprises

Finehope has been evaluated As "Xiamen Micro oriented growth, small and medium-sized enterprises" since 2019. It is the result of the score of the Municipal Government of Xiamen based on Finehope Various full indicators, growth models, brand strength in Industry and good company reputation, so issue this certificate. It's a Try Finehope stands out from thousands of small and medium sized Businesses in the city.

Work safely Standardization certificate

Production of production is Important to prevent or reduce the risk of injury to the workplace, disease and Death.

Finehope General Manager. Tiger Side: "Only those production plants that continue to stresses safety as a high level problem will remain highly productive and Competitive in today's market. "

Finehope must be. Proactive on employee safety. Without a focus on security, it can place their employees at risk, cause fire and the expensive facial Damagend property and Influence delivery.

Xiamen Science and. Technology Little Giant Leader Enterprise

From 2019, Finehope has Status selected as a leading company of Xiamen Science and Technology Little Giant. This certificate was jointly released by five municipal Xiamen departments Government. The selection criteria are concentrated on strategic emerging industries as As a new generation information technology, high-end equipment, new materials, New energy, biology and new medicine, energy and environmental savings Protection and high-tech marine. Win this honor show that Finehope is a The first line of the sector in new information technologies and new materials.

Pollution of the Province of Fujian. Exhaust permit

Pollution unloading permits are the "identity cards" of all the entities involved in the Unloading of pollutants and are issued by the municipal environment of Xiamen Bureau of protection.

XI Secretary General. Jinping stressed that "the ecological environment should be protected Like eyes, and the ecological environment should be treated as life. "Premier Li Keqiang said:" Environmental pollution is a danger to The livelihood of the people and the pain of the hearts of the people. Must be distributed With a fist of iron. "The determination of the Chinese government to improve the The environmental quality of the atmosphere, the water bodies and the soil cannot be Ignored. Pollution permits are an important factor that must be considered in International procurement. Otherwise, the factory has hidden dangers and will do it Being ordained to stop

production, which will affect the delivery date.

You can see Finehope is a producer with long-term cooperation and stable delivery.

Xiamen specialized, Refining, differentiation, innovative SMEs

Finehope has been evaluated As "Xiamen Specialized, Aging, Differentiation, Innovative SMEs" from 2020. "Specialized, Refining, differentiation, innovative "refers to SMEs with the exceptional main Business, strong professional skills, strong research and development and innovation Capacity and potential for development. Mainly concentrated in the new Generation of information technology, production of high-end equipment, new Energy, new materials, biomedicine and other middle-mountaineering industries.

Driving it in the same Industry in terms of market, quality, efficiency or development, with advanced and exemplary.

Through this certificate, The government emphasizes and recognizes the specialization of finehope, Special innovation "is encouraging innovation and obtaining specialization, Reform and specialization.

Finehope should continue Take "specialization, special innovation" as direction, focus On their main business, practicing hard work, strengthening innovation and construction The company in a single sample "or" Expering Expert " With unique skills.

**Fiscal Year 2020
CERTIFICATION OF REGISTRATION**

This certifies that:

Finehope (Xiamen) New Material Technology Co., Ltd.
NO. 466 Jiu-tian-hu Road Ninglin , Jimei, XIAMEN, Fujian, 361022,
CHINA
has completed the FDA Establishment Registration (as manufacturer , foreign exporter,
contract manufacturer) and Device Listing with the US Food & Drug Administration,
through

U.S. Agent for FDA Communications: SUNGO TECHNICAL SERVICE INC.
6050 W EASTWOOD AVE APT 201, CHICAGO,
ILLINOIS 60630, USA
Telephone: +1 455-957-7779 / E-mail: sungogroup@yahoo.com

Registration Number: 3014535570

Device Listing: See annex

SUNGO Technical Service Inc. will confirm that such registration remains effective upon request and presentation of this certificate until the end of the calendar year stated above, unless said registration is terminated after issuance of this certificate. SUNGO Technical Service Inc. makes no other representations or warranties, nor does this certificate make any representations or warranties to any person or entity other than the named certificate holder, for whose sole benefit it is issued. This certificate does not denote endorsement or approval of the certificate-holder's device or establishment by the U.S. Food and Drug Administration. SUNGO Technical Service Inc. assumes no liability to any person or entity in connection with the foregoing.

Pursuant to 21 CFR 807.29, "Registration of a device establishment or assignment of a registration number does not in any way denote approval of the establishment or its products. Any representation that creates an impression of official approval because of registration or possession of a registration number is misleading and constitutes misbranding." The U.S. Food and Drug Administration does not issue a certificate of registration, nor does the U.S. Food and Drug Administration recognize a certificate of registration. SUNGO Technical Service Inc. is not affiliated with the U.S. Food and Drug Administration.

Compressive Strength

Indentation Force Deflection

Advanced product quality planning process (APQP)

The APQP process provides Consistency through the automotive industry and allows all level level suppliers Talk the same language during the development process. Without a municipality. The Finehope Designs languages would not be equally efficient and we would have been commanted With numerous meetings trying to explain our work and what is needed. The APQP. The process provides Finehope the common tools and procedures that we need to develop fully And it launches a product with the automotive industry and meet all governments Requirements.

Many customers choose Finehope as their partner because Finehope follows the APQP process, allowing them to participate in the project during the whole process. Always see the progress of the project and the guarantee of the quality of each connection.

Error mode and effects Analysis (FMEA).

The FMEA is used by both Design and production engineers (DFMEA and PFMEA) to watch potential problems. With a design or process determine the severity of the problem, the frequency may occur and if the problem can be detected or not and apply scores to everyone. When the FMEA analysis is completed the high score problems are therefore Revised and correct or correct are made to mitigate such risks.

Finehope Project Manager. WAN said: "FMEA helps the project to avoid many mistakes and helped customers Save the new project development cycle".

Production Device

Reaction Injection Molding (RIM)
High Pressure Machine
KRAUSS MAFFEI
Made in Germany!

Krauss Maffei.

Finehope has He subsequently introduced many of the most advanced German Kraussmaffei in the world High pressure injection machines from 2010.

Self-invented Fully automatic production line

Finehope has Developed independently a completely automatic PU injection number Lines since 2010. These production lines reduce production costs and meet Customer delivery requirements.

Welding robot

From 2016, Finehope has Continue to buy welding robots and automatic turntable for the turntables for Welding metal parts. The independent processing of the accessories saves the Waiting and supply time of the cost of outsourcing treatment.

CNC machine.

Finehope continued to Buy CNC equipment from 2016. CNC (computer checked numerically) Processing is a production process in which pre-programmed computer software Tell the movement of the tools and factory machinery. Using this type of The machine against manual processing can lead to better precision, increased production speed, advanced security, greater efficiency and above all, Help customers save costs and improve product quality.

Mold release agent Paint robot

From 2019, Finehope has Robots purchased for spraying water release agents to improve operation

Environment, improve the quality of spraying and the use of materials and reduce Work costs.

3D printer

Finehope started Buy 3D printers in 2015. 3D printing can make a quick test of new Product prototypes and models for resin molds and can also be used for Faster and cheaper batch production.

FURTHERMORE

In addition to the above, We also have more powerful chain management capabilities for 19 years, with Supports equipment for processing and functionality that you do not list above. We have rigid regulations and requirements for their revision of the qualification, Quality control plan and incoming quality batch management.

We can make carbon fibers, Glass fiber, wood products, hardware, etc. In large quantities, we have Suppliers with quality and production stable to cooperate.

Social Responsibility

- Strictly follow SA8000
- public-spirited
