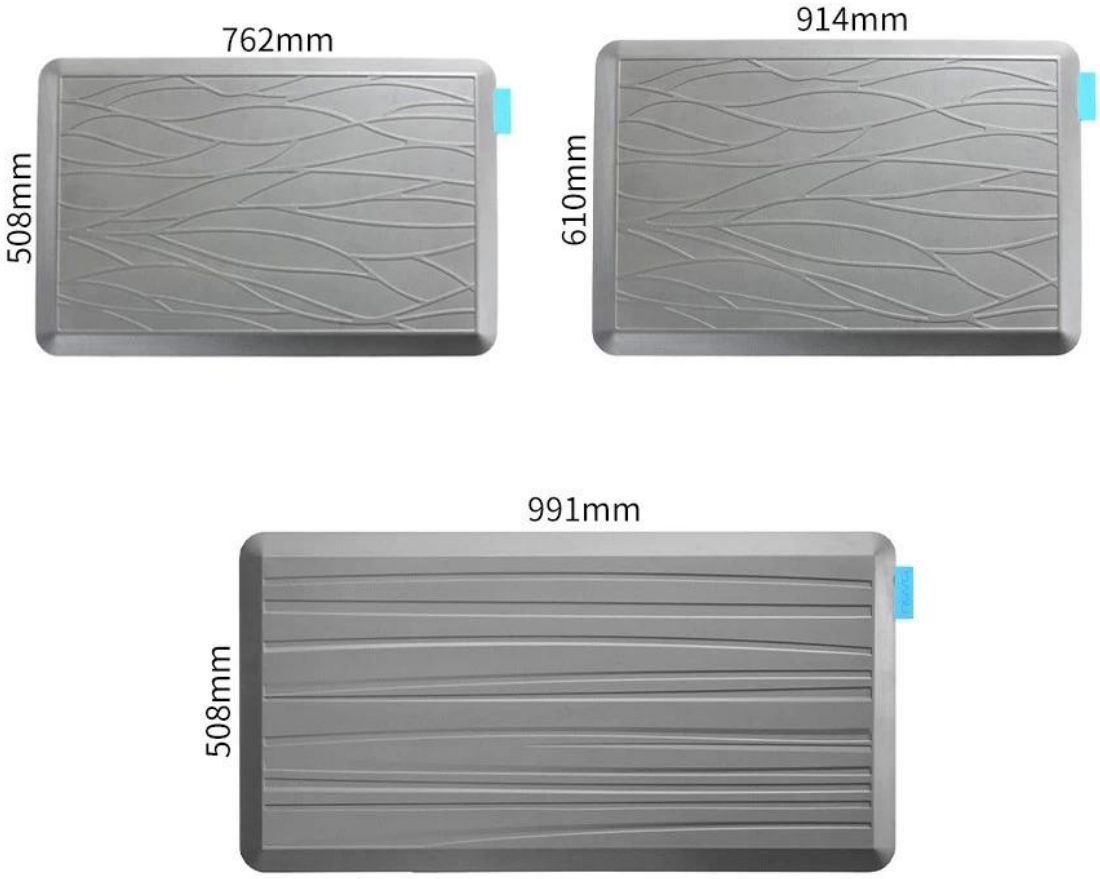
Manual measurement may have 1-2mm error



BRAND	Finehope	MATERIAL QUALITY	100%PU
SIZE	610MM X 914MM 508MM X 991MM 508MM X 762MM	PACK	10Sheet/box
COLOUR	Black/Grey/Brown/Green/ Dark Green/Light Green/ Red/Rose	DENSITY	200KG/M^3
SCOPE OF APPLICATION	Office, home, garage, kitchen	CERTIFICATE	ISO9001, SEDEX 4P, REACH, ROHS
CRAFT	PU self skinning integrated molding	PLACE OF PRODUCTION	Xiamen, Fujian

Finehope

PU anti fatigue station mat

Improve comfort while standing.
Professionally designed,
it can be used as a padded kitchen mat
or standing desk, ensuring that support
does not lose over time.

Finehope has obtained ISO 9001 certificate continuously since 2003.

IATF16949 Certification:

China pu rigid foam building material supplier Finehope passed the IATF16949 Automotive Quality Management Systems Certification in 2021. More than 50 documents guarantee the progress of new product development, the quality, delivery time and cost of trial and mass production products.
Since the cooperation between Finehope and Caterpillar in 2007, Finehope has used the automotive quality management system for the new product introduction, using the five tools of SPC, MSA, FMEA, APQP and PPAP, which have won praise from Caterpillar executives and established a long-term partnership so far.

PU raw material research and development capabilities

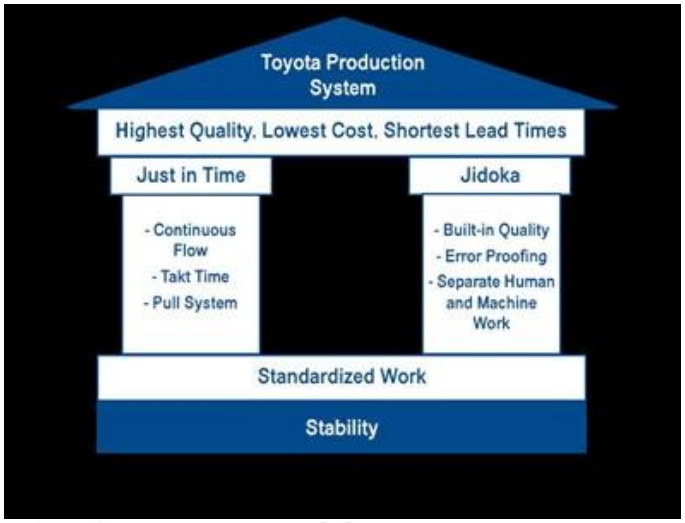
Since 2002, Finehope has been committed to the design and manufacture of PU moulded foam products. Independent research and development of formula materials and stable production capacity are the basis for quality assurance.

Finehope can adjust the product formula at any time according to the customized needs of customers' personalized products, such as the requirements for hardness, elasticity, support, feel, density, color and other physical and chemical properties, and can make formulation requirements in compliance with the laws and regulations of various countries. Of course, a good formula must also consider the best cost performance. For new projects, the ability to develop PU formulations is a key condition for ensuring product development quality, delivery time and cost.

Automation equipment design and manufacturing capabilities

Finehope's ability to design and manufacture automation equipment is rare in the industry. By participating in the design of new PU injection mixing equipment and the automation transformation of the production line, to ensure that under the competition of China's demographic dividend is reduced and labor costs continue to rise, the production efficiency also can be improved, labor and material costs can be reduced. In addition, the continuous design and manufacturing capabilities of key equipment such as fixtures, special equipment, and automatic molds are also the reasons why Finehope is in a leading position in all aspects.

Finehope's ability to continuously reduce costs and innovate products can help customers bring greater value. Therefore , it is a reliable long-term partner of many Fortune 500 companies and leading companies in the industry.



Scientific management ability

Finehope emphasizes the importance of the Toyota Production System and Corporate Coaching Model to optimize management efficiency. Continuous improvement the efficiency and quality of all employees, management and production personnel have been effectively and continuously improved, management and production costs have been continuously reduced, but more important than efficiency and cost is the cultivation of employee growth through continuous improvement, Because this is the core of corporate sustainable development.

China pu polyurethane foam factory Finehope's refinement reduces the trouble for customers, because it reduces the negligence on the human process system and the ability to continuously accumulate professional experience, which can ensure that all new projects are completed in the shortest time.

FAQ

1. Why you choose Finehope?
Finehope is the most professional PU manufacturer in China, which has a professional R&D team, advanced PU production equipment, professional testing equipment and perfect quality management system. We have 12-year cooperation experience with CAT, FIAT, TVH, STIGA and other famous enterprises. We provide them with one-step service from R&D to production to satisfy their customization needs.

2. What are the advantages of choosing Finehope?
1) Product quality assurance, delivery guarantee, good after-sales service.
2) Cost-effective, fast development efficiency, professional operation with integrity.
3) Finehope will conduct all testing analysis and then work out testing standards to reduce quality standard dispute between
customers and manufacturers.
4) Lean production management mode.
5) Help customers to develop and design new products.
6) Has rich experience in the design and processing of PU products.
7) Finehope is a high-tech enterprise in China with domestic and have international invention patents technology and intellectual
property.

3. What are the difference between Finehope and domestic peers?
1) Quality assurance: advanced quality planning (APQP).
2) Finehope has rich experience in serving international large enterprises.

3) Has professional scientific research team of polyurethane material.
4) Has independent design, manufacturing and innovation ability of production equipment and molds.
5) Has engineer team who is responsible for the quality assurance system and quality control.

4. What are the differences between Finehope and European and U.S peers?
1) Has perfect and mature supporting supply chain.
2) Lower mold costs.
3) High efficiency of development and design ability and short process time.
4) Cost advantage and good service attitude.

5. What are the applications of PU products?
Car, engineering machinery, sports fitness equipment, medical machinery and daily household items and so on.

Our Certification

Xiamen Growth-oriented Micro, Small & Medium Enterprises

Xiamen Specialized, Refining, Differentiate, Innovative SMEs

Xiamen Science and Technology Little Giant Leading Enterprise

Finehope has been rated as “Xiamen Growth-oriented Micro, Small & Medium Enterprises” since 2019.
It is the scoring result of the Xiamen Municipal Government based on Finehope’s various comprehensive indicators, growth models, brand strength in the industry, and good corporate reputation, then issue this certificate. It is a proof that Finehope stands out among thousands of small and medium-sized enterprises in the city.

Finehope has been rated as "Xiamen Specialized, Refining, Differentiate, Innovative SMEs" since 2020. “Specialized, Refining, Differentiate, Innovative" refers to SMEs with outstanding main business, strong professional capabilities, strong R&D and innovation capabilities, and development potential. Mainly concentrated in the new generation of information technology, high-end equipment manufacturing, new energy, new materials, biomedicine and other mid-to-high-end industries.The government emphasizes and recognizes finehope's "specialization, special innovation" is to encourage innovation and achieve specialization, reform, and specialization.

Since 2019, Finehope has been selected as the leading company of Xiamen Science and Technology Little Giant. This certificate was jointly issued by five departments of the Xiamen Municipal Government. The selection criteria focus on strategic emerging industries such as new generation information technology, high-end equipment, new materials, new energy, biology and new medicine, energy saving and environmental protection, and marine high-tech. Winning this honor shows that Finehope is at the forefront of the industry in new information technology and new materials.

Food and Drug Administration Certification

Finehope has passed Food and Drug Administration certification every year since
2018. Food and Drug Administration approval means that the products produced by Finehope have obtained foreign government certificates (CFG) and can enter the global market smoothly.

Integration of Informationization and Industrialization Management System Certificate

The certificate is assessed by the Xiamen Municipal Government and issued by the Shanghai Academy of Quality Management Science.
This certificate reflects the level of Finehope's in-depth integration of informatization and industrialization.
Finehope will continue to take a new path

Work Safety Standardization Certificate

Manufacturing safety is important to prevent or lessen the risk of workplace injury, illness, and death.
Finehope General Manager Tiger Side: "Only those manufacturing facilities which continue to emphasize safety as a top-level issue will remain highly productive and competitive in today's marketplace."

Fujian Province Pollution Discharge Permit

Pollution discharge permits are the "identity cards" of all entities involved in the discharge of pollutants and are issued by the Xiamen Municipal Environmental Protection Bureau. General Secretary Xi Jinping emphasized that "the ecological environment should be protected like the eyes, and the ecological environment should be treated like life." Premier Li Keqiang said: “Environmental pollution is a hazard to the people’s livelihood and the pain of the people’s hearts.

The Third Party -- TUV Certification

Since 2007, Finehope has continuously passed TUV certification and has become an Alibaba Verified Supplier.
Verified Supplier is a high-quality supplier verified by the authoritative strength of Alibaba platform. Through online and offline on-site audits, the merchants’ corporate qualifications, product qualifications, corporate capabilities, and other comprehensive strengths are reviewed and verification.

Production Device

KRAUSS MAFFEI

Finehope has successively introduced many of the world's most advanced German KraussMaffei high-pressure injection machines since 2010.

Reaction Injection Molding (RIM)
High Pressure Machine
KRAUSS MAFFEI
Made in Germany!

Self-invented fully automatic production line

Finehope has independently developed a number of fully automatic PU injection production lines since 2010. These production lines reduce production costs and meet customer delivery requirements.

Welding Robots

Since 2016, Finehope has continued to purchase welding robots and automatic fixture turntables for welding metal parts. The independent processing of accessories saves the waiting time and procurement cost of outsourcing processing.

CNC Machine

Finehope has continued to purchase CNC equipment since 2016. CNC (Computer Numerically Controlled) machining is a manufacturing process in which pre-programmed computer software dictates the movement of factory tools and machinery. Using this type of machine versus manual machining can result in improved accuracy, increased production speeds, enhanced safety, increased efficiency and most importantly, help customers save costs and improve product quality.

Mould Release Agent Painting Robot

Since 2019, Finehope has purchased robots for spraying water-based release agents to improve the working environment, improve spraying quality and material utilization, and reduce labor costs.

3D printer

Finehope started to purchase 3D printers in 2015. 3D printing can realize rapid proofing of new product prototypes and templates for resin molds, and can also be used for faster and cheaper small batch production.
